HEALTH EDUCATION CURRICULUM GUIDE

Grades 1-12

**THE COMMONWEALTH OF MASSACHUSETTS
DEPARTMENT OF EDUCATION**

**DIVISION OF CURRICULUM AND INSTRUCTION
BUREAU OF ELEMENTARY AND SECONDARY EDUCATION**

FOREWORD

The health problems in the state and the nation can no longer be ignored. Conservation of our human resources is now one of our most critical responsibilities. The comprehensiveness of this curriculum guide should help to set the pattern for increased involvement of the home, school, and community in improving the quality of life of each child, so desperately needed for the '70's.

It is with this in mind that this curriculum guide has been designed. Intelligent use of this publication can serve as the initial step in filling a void in the total process of educating each child in the schools throughout the Commonwealth. It recognizes that health practices and behavior patterns need to start as early as possible in the child's learning experience. Health education must be made available in the educational setting.

All school systems in Massachusetts need to reassess their goals and objectives and carefully evaluate their health-education programs. Not until each system has provided an effective program with qualified teachers, will the needs of the children be met adequately.

Neil V. Sullivan

Commissioner of Education

THE COMMONWEALTH OF MASSACHUSETTS
Department of Education

POLICY STATEMENT ON SCHOOL HEALTH EDUCATION

The World Health Organization has broadly defined health as being: "... a state of complete physical, mental and social well-being; not merely the absence of disease or infirmity."

Chapter 71, Section 1 of Massachusetts law currently mandates instruction in "physiology and hygiene." This law serves as the basis for instruction in all major health topic areas for Massachusetts schools.

The school-age child's state of illness or wellness has a far-reaching effect upon his ability to achieve the most of which he is capable from his educational opportunity. The role of the school in conserving and promoting good health is traditional and clear-cut.

The total school health program is comprised of three phases: health instruction, healthful school environment and school health services. Local school districts must work to coordinate and fully articulate all three phases under appropriate educational leadership.

The Board of Education and the Department emphasize that there is neither time in the curriculum nor justification for separate courses in any of the many categorical health topic areas periodically advocated by special interest groups. Fragmentation, or the "bits and pieces" approach must be avoided in order to achieve a meaningful and effective total school program.

The Board of Education and the Department therefore recommend inclusion of all health topics within a comprehensive health program extending K-12 with full attention to scope and sequence.

Such an approach avoids teaching specific health topics in isolation, avoids "crash programs" and establishes the organizational framework within which local school districts may establish their own priorities and meet the health needs of school-age children in their own communities. An excellent vehicle for accomplishing this and also for involving other community agencies, is the formation of a school health council in each school district.

Health is a unified concept and is concerned with knowledge, habits, attitudes and behavior of the total and maturing human being. One sound, interrelated and sequential health program not only saves valuable curriculum time, but assures that all topics will be a part of (not apart from) a long-range, ongoing program with complete and detailed consideration at the appropriate grade level.

Voted by the
Board of Education
November, 1968

INTRODUCTION

Health education is a life science. It is the sum of all the experiences which will assist in changing behavior patterns for the better as they relate to the application of knowledge to produce and maintain health. Health is a quality of life, and the degree or level is determined by the interest or ambitions of the individual. To achieve this quality of effective living, youth must receive the available scientific facts by way of the educational process in all areas of the school curriculum. Circumstances in our society clearly indicate that the school environment, created for the purpose of preparing future citizens, in cooperation with the home, community leaders, and resource personnel, must assume the responsibility for educating youth in matters concerned with the quality of living. Youth deserves the right to live effectively in his environment affected as it is by man.

A comprehensive, sequential, health-instruction program should be provided in every school throughout the school years. The health coordinator, health teacher, classroom teacher, and other resource personnel should guide youth in the process of discovering the facts which help him make favorable behavioral decisions about health. Acquisition of such knowledge should be an on-going process, because health is the result of a continuous living experience. And as the life span increases, health education opportunities should be designed to maintain the most effective quality of life.

An individual's or a community's success in maintaining a better than satisfactory level of health and safety depends equally upon that which is done by the individual as well as by group action and reaction. There should be complete interdependence where health is concerned, requiring all persons to make decisions which reflect desirable behavior patterns to benefit the individual, home, school, and community.

A major responsibility of all educators is to be currently informed about the emerging health issues. Pupils' concerns must become teachers' concerns if learning is to become reality.

This health guide has been prepared by individuals representing various levels of education at the school and college levels as well as representatives from public health, community health, voluntary health organizations, and professional organizations. It offers school administrators, supervisors, coordinators, teachers, and others, guidelines for presenting health information in an educational environment to children and youth. The guide is deliberately designed to be fluid, permitting local communities the privilege of designing the course work in detail from the first years of school to the last in accordance with the specific priorities of the local community.

Educators, recognizing the ever increasing abundance of health problems existing today, suggest that the concepts and primary concerns found in the guide should evolve in course work via a comprehensive, sequential program in grades 1-12. During the periods when growth and development are significant, children and youth should acquire information relevant to their needs. Such information affords them a basis for interaction with their classmates as well as a foundation for making wise decisions when confronted with having to prevent illness and maintain health.

This guide relates to such current critical areas of health as drug information,

consumer health, preventing disease and arresting disorders, avoiding accidents, techniques for maintaining healthy teeth, methods of controlling earth pollutants, understanding how to get along with people, making wise decisions when buying and eating foods, and other vital areas. The guide recognizes that the school is uniquely suited to the task of encouraging youth to develop ways to manage themselves physically, mentally, socially, and culturally in their environment.

Children and young adults will enjoy the opportunity of improving the quality of living by discovering how to live more effectively. Influential teachers, who are exemplars of health practices, may increase their own measure of effectiveness and automatically transmit the desire to follow a health career to those they teach. Health education can be a unique instrument to gain this end, and the teacher of health may well be considered the sculptor of the future.

Dana L. Farnsworth, M.D.

Elizabeth A. Neilson, Ed.D.

PURPOSE OF THE GUIDE

This Health Education Curriculum Guide has been developed to assist local school districts develop stronger, more effective school-health programs. The guide does not pretend to serve as a panacea for all the health needs which exist in our society. It should, however, serve to expand the thinking and give direction to curriculum committees responsible for improving the quality of health instruction in our schools.

Due to present demands for assistance in certain critical health areas, the Department of Education and the Health Education Curriculum Advisory Committee have established the seven fields of study which are included in this initial publication as priority needs. Additional fields of study are now nearing completion and will be published in the near future.

The Department of Education is aware that refinement of this initially-published section of the guide will of necessity have to be made. As educators throughout the Commonwealth use this document to guide them in the development of local programs, suggestions for improving the guide may well be forthcoming. For this purpose, an evaluation sheet has been included in the guide wherein comments, criticisms, and suggestions from local school districts, may be forwarded to the Department.

The immediate concern of educators, physicians, parents, health personnel, and others for the critical health needs of our youth now requires positive action on the part of all citizens throughout the Commonwealth.

The guide is organized into four broad areas of health:

Physical Health
Mental and Social Health

Consumer and Environmental Health
Safe Living

These four broad areas encompass the essential qualities of well-being which enable the child to live effectively and enjoyably. The following specific fields of study have been designated as priority needs and thus are included in this initial and partial publication:

Consumer Health	Emotional Development
Drugs — Alcohol, Tobacco, and Other Drugs	Nutrition
Safety and Accident Prevention	

At the completion of the entire curriculum guide, the additional fields of study will include the following:

Body Structure and Function	Family Life
Cleanliness and Appearance	First Aid
Community Health	Fitness and Body Dynamics
Dental Health	Health Careers
Disaster Behavior	Sensory Perception
Diseases and Disorders	Sleep, Rest, and Relaxation
Ecology	World Health

These various subject areas, or fields of study, have been isolated for convenience in developing curriculum in the many communities throughout the Commonwealth. These fields of study will be most effective if they are interwoven one with another. For example, drugs cannot be taught without considering emotional development and body functions.

As school systems continue to develop curriculum in health education, the following suggestions might be considered:

1. Establish a health education committee in the local school system. This committee should have a broad representation of administrators, teachers, health related personnel, community health representatives, religious groups, parents, and students.
2. Have the committee set up goals and objectives to meet the health needs of the children and the specific local community under the direction of a well-qualified health coordinator.
3. Have the committee evaluate the school health program, considering all aspects of the health-instruction phase of the program, the health services provided for the school child, and the healthful school environment which is so important in contributing to the learning situation.
4. Organize a curriculum sub-committee and develop a course of study, insuring flexibility in sequence and content consistent with the health interests and needs of the students and local community. Utilization by this committee of the Department of Education Health Education Curriculum Guide as an aid in developing local curricular materials is recommended. It is not recommended that this guide be used as a teaching guide by the classroom teacher.
5. Utilize qualified individuals, agencies, voluntary organizations, and professional associations locally and throughout the state as important resources.

Area I PHYSICAL HEALTH

Content includes: *Body Structure and Function, Cleanliness and Appearance, Dental Health, Fitness and Body Dynamics, Nutrition, Diseases and Disorders, Sensory Perception, Sleep, Rest, and Relaxation.*

The Physical Health area focuses on factors which determine the level of health each child and youth may possess. The student discovers how his growth and development are partly affected by the body he inherits and partly by his behavior and environment.

The student becomes aware of the health factors which profoundly affect his growth process. He discovers how his daily living routine favorably or unfavorably controls his health. He also becomes aware of the body's basic structure and function – its anatomy and physiology – and techniques for maintaining the masterpiece. The student learns that there is a close interrelationship among all of his complex physical body parts. He learns that the body needs special nutrients; regularly scheduled physical activity; daily application of known dental facts; and a planned program of sleep, rest, and relaxation to maintain health, control disorders, and prevent diseases. This area helps the student to understand and appreciate his physical appearance and his internal mechanism. He discovers that the intricacies of the functioning of the body systems can be made simple by regularly scheduled application of health facts, which in turn, prove economical by preventing health problems.

Area I guides the student to a greater appreciation of his body as he learns that it is far more complex than any computer or mechanical invention created by man.

Area II MENTAL AND SOCIAL HEALTH

Content includes: *Emotional Development and Family Life and Drugs.*

Mental health is a multidimensional area involving all aspects of living, and it is manifested directly in terms of emotional and social well-being.

Many of the hospital beds in this country are occupied by the mentally ill, and thousands of people outside the hospitals are in real need of psychiatric help to restore their sense of values and their ability to carry on major life functions in a pleasant and efficient manner.

Both youth and adults need to know themselves and be able to adjust to the complexities and pressures of present-day living.

As the population increases and large masses of society are living in close proximity to one another, there is significant need to understand how the other person feels, why he feels this way, and how it affects his behavior and the behavior of others. It is for this purpose that the mental health material in this section was designed.

There is deep concern today that the sociological health problems are becoming more

significant in our affluent society. It is important that students be given opportunities to understand better the health implications relative to all chemical substances which have a potential for abuse.

The content included in this area is relevant to all other subject areas of the health curriculum. Through a growing understanding of the development of human emotions, the student will be better prepared to make decisions relative to personal desires, social relationships, and personal family interactions, permitting him to participate in a happy and productive life.

Area III CONSUMER AND ENVIRONMENTAL HEALTH

Content includes: *Ecology, Health Careers, Community Health, World Health, and Consumer Health.*

The Consumer and Environmental Health area focuses on the interrelationships of man with his fellow men and his environment. The student discovers how man is influenced by his environment and how he alters the environment both beneficially and adversely. Awareness of the scope of environmental problems including global involvement is desirable.

Modern community health programs are explored on local, state, national, and international levels. The roles of official and voluntary health agencies, of professional associations, and of foundations are studied, and the effect of legislation, both state and federal, is identified. An historical review of the development of public health in Massachusetts and current program areas provides an excellent prototype for those who seek approved models.

The student becomes familiar with the varied and diverse vocational opportunities offered by the health field. In addition to monetary return, the satisfaction of service to one's fellow man through a health career is emphasized.

An understanding of how to be a knowledgeable consumer of goods and of health services assists the student as he eventually becomes an independent health consumer. Quackery is explored in depth, including historical examples as well as modern examples and techniques. Emphasis is placed on its prevalence, how to recognize it, and how to avoid being a victim.

The role of the individual as a consumer of health services and his responsibility for their proper utilization is defined.

Area IV SAFE LIVING

Content includes: *First Aid, Safety and Accident Prevention, and Disaster Behavior.*

Safe Living is one of the most critical areas in today's society. Affluence and giant steps in the field of science have made large numbers of persons, particularly our youth, more vulnerable to accident situations. The increasing scope of recreational pursuits such as swimming and boating without proper training and lack of emergency measures to be taken

in times of disaster have created new problems. These are of major concern to all citizens.

Safe Living implies the development of safety attitudes essential for survival in our now complex society. Although man boasts of controlling his environment, there is still need for the student to understand the emergency nature of a catastrophe and the procedures necessary to protect himself and others.

Education for accident prevention and emergency care is the responsibility of the individual, the home, the school, and the community.

EARLY CHILDHOOD

Area I PHYSICAL HEALTH

Field of Study NUTRITION

Objectives

To help the pupil to:

1. Establish an understanding of what food is.
2. Know that certain foods are needed every day.
3. Acquire good food habits.
4. Understand that eating good food is an enjoyable experience.
5. Appreciate the importance of good health habits for "safe" food.
6. Appreciate the need for cooperation between home and school in nutrition education.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Clean, safe food is important for health.</i></p> <ol style="list-style-type: none"> 1. Clean cooking and eating utensils 2. Personal cleanliness <p><i>Food should be inspected and stored properly to prevent spoilage.</i></p>	<ol style="list-style-type: none"> 1. Have each member of the class help to prepare food at home, and report to the class. 2. Discuss the reasons for washing food before it is prepared or eaten. 3. Arrange to tour the school kitchen to see how food is made clean and kept clean. 4. List the reasons for washing hands before eating. Draw pictures to illustrate the reasons. 5. Show how foods are protected from dirt, air, and insects, e.g., packaging, canning, refrigerating, freezing. 	<p><i>Book</i></p> <p>Lowenberg, Miriam, <i>et al. Food and Man.</i></p>
<p><i>Home, school, and community should cooperate in nutrition education.</i></p>	<ol style="list-style-type: none"> 1. Have the class report what they have learned about nutrition to parents. 2. With the cooperation of the school food service supervisor, invite parents to lunch or breakfast. 3. Invite community resource people involved in food services to discuss their work. 4. Take a field trip to a dairy farm, bakery, or grocery store. 	

Area II MENTAL AND SOCIAL HEALTH

Field of Study TOBACCO, ALCOHOL, AND OTHER DRUGS (Early Childhood)

Objectives

To help the pupil to:

1. Develop positive attitudes toward proper use of drugs as substances beneficial to man's well-being.
2. Learn about the potential dangers in the misuse of drugs.
3. Understand the harmful effects of smoking and of the abuse of alcohol.
4. Gain an understanding of the harmful effects of household chemical compounds and related substances.
5. Become informed about the sources of drugs.
6. Develop meaningful relationships with parents, doctors, nurses, and druggists.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Some drugs are used by doctors to promote better health.</i>	<ol style="list-style-type: none"> 1. Discuss drugs which make people feel better (aspirins, cough medicine). 	<i>Guide</i> <i>Drug Abuse Education.</i> American Pharmaceutical Association.
<i>Some drugs are prescribed by doctors to protect against illness.</i>	<ol style="list-style-type: none"> 2. Plan a field trip to a pharmacy. 3. Encourage the pupils to participate in role playing of doctor and druggist. 4. Discuss and list the immunization shots the children have received. 5. Discuss the reasons why these shots were administered. 6. Schedule a visit by a school nurse or physician. 	<i>Pamphlet</i> "First Facts About Drugs." Food and Drug Administration. United States Department of Health, Education and Welfare.
<i>Some drugs are used by doctors to treat illness.</i>	<ol style="list-style-type: none"> 1. List the times that pupils have needed medicine. If possible, have them name the medicines administered to treat the ailments. 2. Have some pupils relate occasions when they needed medicine and how the medicine was administered. 	<i>Books</i> Kitzinger, Angela, and Hill, Patricia. <i>Drug Abuse A Source Book and Guide for Teachers.</i> National Education Association. <i>Drug Abuse: Escape to Nowhere.</i>
<i>Some drugs are used by doctors and dentists to relieve pain.</i>	<ol style="list-style-type: none"> 1. Plan a trip to a dentist's office to observe the procedures. 	<i>Book</i> American School Health Association. <i>Teaching About Drugs.</i>
<i>Drugs can be helpful to persons only if taken as prescribed explicitly by qualified physicians.</i>	<ol style="list-style-type: none"> 2. Discuss uses and effects of anesthesia. 3. Have a child or children discuss their personal experiences with anesthesia. 4. Discuss superstitions concerning pain relief. 5. Show a doctor's prescription to the class. Emphasize the form and its importance (the signature of the doctor, the name of the patient, the directions to be followed, the name of the doctor, and any special notations). 6. Bring an empty medicine bottle to class and discuss the information on the label. 	<i>Pamphlet</i> "Series on Specific Drugs." Public Health Service Publication. United States Department of Health, Education and Welfare.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Children should take medicine only when it is given to them by authorized persons.</i></p> <p><i>Children should be wary of strange persons who want to give them food, candy, etc.</i></p> <p><i>Drugs belong to two large groups: those which are of natural origin and those which are of synthetic origin.</i></p> <ol style="list-style-type: none"> 1. Drugs from plants 2. Drugs produced in a laboratory 	<ol style="list-style-type: none"> 1. Role play a situation where an authorized adult gives the child medicine. 2. Role play a situation, showing the dangers of accepting gifts from strangers. 3. Schedule a visit to a greenhouse to see plants which produce drugs. 4. Schedule a visit to the classroom by a pharmacist or a herbalist. 	<p><i>Pamphlet</i></p> <p>"What We Can Do About Drug Abuse." Public Affairs Committee, Inc.</p>
<p><i>The use of the contents from old or unlabeled medicine containers can be dangerous.</i></p>	<ol style="list-style-type: none"> 1. Bring some empty medicine bottles to class. Read the labels to the children. Discuss the importance of labels and directions. 2. Pour acid or any other volatile substance from an unlabeled bottle onto a penny, and watch the chemical change. 3. Emphasize the importance of not touching or taking medicines that are not labeled. 4. Provide each of the children with a large sample label. Have them write "CAUTION" or "POISON" on the labels, and draw the skull and crossbones. They can take the sample labels home. 	<p><i>Article</i></p> <p>"Students and Drug Abuse," Reprint from <i>Today's Education</i>.</p> <p><i>Books</i></p> <p>Bauer, W.W. <i>Today's Health Guide</i>.</p> <p>Barnhoch, Sidney B. <i>Let's Talk About Drugs</i>.</p> <p>National Education Association, <i>Health Education</i>.</p> <p><i>Pamphlets</i></p> <p>"Children at Play with Poison." United States Public Health Service.</p> <p>"Crutch that Cripples." Council on Mental Health. American Medical Association.</p> <p><i>Teaching Kits</i></p> <p><i>Winston Products for Education</i>.</p>
<p><i>Some drugs produce harmful effects on the body.</i></p> <p><i>Excessive use of drugs may cause dependency which can be harmful.</i></p>	<ol style="list-style-type: none"> 1. Bring in a cigarette package, and display the caution warning on the side. 	<p><i>Book</i></p> <p>Blakeslee, Alton. <i>What You Should Know About Drugs and Narcotics</i>.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Drugs can be harmful if they are not taken exactly as prescribed by a qualified person.</i>	<ol style="list-style-type: none"> 2. Emphasize that the excessive use of anything is bad. Discuss habits such as nail biting and thumb sucking and reasons for this behavior. 3. Discuss the importance of following directions in activities such as games, sports, and when traveling. 4. Discuss the danger of using another person's medicine. 	<p>A complete list of bibliographies is available from the following sources:</p> <p>Food and Drug Administration, Washington, D.C. Academy of Pediatrics, Evanston, Illinois.</p> <p><i>Pamphlet</i></p> <p>"Dennis the Menace Takes a Poke at Poison." United States Department of Health, Education and Welfare.</p>
<i>Alcohol is used in many ways.</i>	<ol style="list-style-type: none"> 1. Discuss the use of alcohol as a beverage in some families. 	<i>Transparencies</i>
<i>Excessive use of alcohol is dangerous.</i>	<ol style="list-style-type: none"> 2. Discuss alcoholic beverages used in religious rites. 	<i>Family Variations Regarding Tobacco and Alcohol.</i> 3M Company.
<i>Tobacco affects the body in many ways.</i>	<ol style="list-style-type: none"> 1. Demonstrate with a mechanical device how tar from a cigarette accumulates in the lungs. 	<i>Book</i>
<i>There are specific reasons why people smoke.</i>	<ol style="list-style-type: none"> 2. To demonstrate the tar in a cigarette, light a cigarette and blow smoke through a tissue. 3. Encourage the pupils to discuss with their parents reasons for smoking. 4. Have the children notice and later discuss advertisements and messages about cigarette smoking on TV. 5. Discuss the medical effects of tobacco (heart disease, asthma, respiratory diseases, etc.). 	<p>Curtis, Lindsay. <i>Smoking or Health.</i></p> <p><i>Pamphlets</i></p> <p>"What's New on Smoking in Films." United States Department of Health, Education and Welfare.</p> <p>"What's New on Smoking in Print." United States Department of Health, Education and Welfare.</p> <p><i>Mechanical Smoking Device</i></p> <p>Winston Products for Education.</p>
<i>Tobacco affects the environment as well as the individual.</i>	<ol style="list-style-type: none"> 1. Cigarettes are the cause of many home and forest fires. Discuss fire safety. 	

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<ol style="list-style-type: none"> 2. Discuss accidents which may be caused while lighting a cigarette. 3. Discuss the ways in which tobacco smoke may pollute the air. 4. Demonstrate with clear glass or plastic container how smoke pollutes. 	
<p><i>Household compounds and related substances contain chemicals and should be so labeled.</i></p> <p><i>Certain household compounds are injurious to health.</i></p> <p><i>Parents should decide what should be placed in the medicine cabinet.</i></p> <p><i>Parents, doctors, dentists, nurses, and druggists contribute to good health.</i></p>	<ol style="list-style-type: none"> 1. Display containers of household compounds and examine the warning signs (skull and crossbones). 2. Illustrate containers which have warnings (cleaning fluids and poisons). 3. Illustrate how bleach is injurious to fabric by pouring some full-strength on fabric and letting it set. Discuss how compounds can endanger health. 4. Ammonia fumes are toxic. Discuss the effects of inhaling these fumes. Bring in containers which have warning labels. 5. Discuss unsafe storage areas for medicines in the home. 6. Make posters, showing what to do and what not to do regarding the medicine cabinet. 7. Have the children role play being a doctor, nurse, druggist, or dentist. 8. Make a diorama of a dentist's or a doctor's office, showing children visiting the office. 9. Have the children put on a puppet show about doctors, dentists, nurses, and druggists. 	
<p><i>Doctors, dentists, druggists, and nurses perform many services in the community.</i></p>	<ol style="list-style-type: none"> 1. Make a mural of the health service areas of the community. 	<p><i>Books</i></p> <p>Byrd, Oliver E., et al. <i>Laidlaw Health Series</i> (1-3).</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>The school physician and the school nurse provide periodic examinations and inoculations for good health.</i>	2. Discuss administration by the nurse of oral vaccine and the Tine test.	Irwin, Leslie W., et al. <i>Dimensions in Health Series: All About You. Growing Every Day. You and Others.</i>
<i>Parents need the help of health specialists for the care of every member of the family.</i>	3. Prepare the pupils for periodic tests or the administration of vaccines.	Schneider, Robert E. <i>Methods and Materials of Health Education.</i>
<i>Many persons and places in the community offer information and help in the prevention and treatment of drug problems.</i>	4. Have community resource people visit the class and discuss their roles. 5. Visit local health agencies such as the District Nursing Association and the Visiting Nursing Association.	

Area II MENTAL AND SOCIAL HEALTH

Field of Study EMOTIONAL DEVELOPMENT (Early Childhood)

Objectives

To help the pupil to:

1. Appreciate that each person belongs to a family, a home, and a community.
2. Develop courtesy and cooperation as elements of a healthy and sound self-image.
3. Develop industry and scholarship.
4. Develop the qualities of honesty and self-reliance as a means of strengthening character.

EMOTIONAL DEVELOPMENT (Early Childhood)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Families, homes, and communities may be similar.</i>		<i>Books</i>
1. Provide shelter, love, and protection	1. Have each child write or tell a story about "Why My Family Is Important to Me."	Bannon, Laura M. <i>Baby Roo</i> .
2. Require rules and laws	2. Have each child draw a picture of a particular member of his family.	Los Angeles County Board of Education. <i>Guiding Today's Children</i> .
3. Promote role development as male or female	3. Engage the children in a discussion of the ways in which they might help out at home and in school. Have them make a mural to illustrate their suggestions.	McClosky, Robert. <i>One Morning in Maine</i> .
4. Require cooperation of individual members	4. Discuss any personal experiences the children have had while attending school in another community or country.	<i>Films</i> <i>Moving Day—Timmy's New Neighbors</i> . Coronet Films.
<i>Families, homes, and communities may be different.</i>	5. Discuss ways in which each child's family plans activities which will permit the members to be together.	<i>Your Family</i> . Coronet Films.
1. Varied customs and ethnic backgrounds	6. Show illustrations of different environments. Discuss the living patterns of children in the jungle, desert, mountains, etc.	<i>Filmstrip</i> <i>Getting Along with the Family</i> . Society for Visual Education, Inc.
2. Varied daily routines	7. Introduce one or two new games to emphasize the importance of learning rules in order to enjoy the game.	
	8. Write the name of each child in the class on a card. Place the names in a box. To assign responsibilities, draw name cards from the box.	
	9. Make a study of family customs and holidays around the world. Include folk songs and traditional dances. Discuss how these customs and holidays differ.	
<i>Human feelings are experienced by all people.</i>	1. Discuss the various ways of promoting happiness.	<i>Books</i>
<i>Happiness comes from giving, from receiving, and from the happiness and love of others.</i>	2. Discuss or have the pupils write about "Happiness is . . ."	Anderson, Hans C. <i>The Ugly Duckling</i> . Anglund, Joan W. <i>Love Is a Special Way of Feeling</i> .

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The expression and/or control of feelings differs in degree and kind.</i></p> <p><i>Anger is a normal feeling.</i></p> <ol style="list-style-type: none"> 1. Can be due to many factors 2. Can be controlled <p><i>Feeling sad is part of life.</i></p> <p><i>Fear is a normal and valuable feeling.</i></p> <ol style="list-style-type: none"> 1. Can be a preventive factor to danger 2. Can be controlled 3. Excessive fear undesirable 	<ol style="list-style-type: none"> 3. Have the children make posters and drawings, illustrating various feelings. 4. Discuss reasons why people show emotions. 5. Have the children read or discuss stories or poems that show emotions. 6. Discuss acceptable ways of expressing anger. Role play acceptable ways of controlling and properly expressing anger. 7. Find acceptable ways of working off the feeling of anger (walking, running, playing hard, modeling clay, singing). 8. Discuss ways in which class members can promote better feelings toward one another. Put the suggestions into practice. 9. Discuss the many fears that an individual can have. Attempt to find reasons for them. 10. Have class members predict what might happen to an individual who is totally without fear. 11. List ways in which fears may benefit an individual. 	<p>Byler, Ruth, <i>et al. Teach Us What We Want to Know.</i></p> <p>Grollman, Earl A., ed. <i>Explaining Death to Children.</i></p> <p>Irwin, Leslie W., <i>et al. Dimensions in Health Series: All About You. Growing Everyday. You and Others.</i></p> <p><i>Film</i></p> <p><i>Don't Be Afraid.</i> Encyclopaedia Britannica Educational Corp.</p>
<p><i>The way one feels affects what one does.</i></p>	<ol style="list-style-type: none"> 1. Have the children talk about the quality of their schoolwork when they are happy and when they are sad, angry, or afraid. Ask them if they think the way they feel ever affects the way they work or play. 2. Have a "problem box." At a specific time each day, draw out one problem. Allow the children to discuss possible solutions to the problem. 3. Discuss the following questions: <ol style="list-style-type: none"> (1) Why does a person feel better when he discusses his problems with someone? 	<p><i>Books</i></p> <p>Biem, Jerrold. <i>The Smallest Boy in the Class.</i></p> <p>Leaf, Munro. <i>Fair Play.</i></p> <p><i>Film</i></p> <p><i>Let's Play Fair.</i> Coronet Films.</p> <p><i>Filmstrip</i></p> <p><i>Learning to Be Forgiving.</i> Society for Visual Education, Inc.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<p>(2) Why is it important to listen to someone who has a problem?</p> <p>4. Hold group discussions on how to share fun and sadness with others.</p>	
<p><i>Everyone can do something well.</i></p> <p><i>Growth patterns and natural abilities vary with each individual.</i></p> <ol style="list-style-type: none"> 1. Good skills developed 2. Memory improved through repetition 3. Efficiency improved through skill development 	<ol style="list-style-type: none"> 1. Have a classroom or library display on "What I Do Best." With teacher assistance each child can decide upon a project for this display. 2. Through the use of different media observe and discuss differences in the growth of pets, flowers, and people. 3. Use baby pictures and height and weight charts to show growth. Discuss variations of growth in people. 4. Have each child make a booklet called "All About Me." He can include pictures, drawings, and stories about himself, his home, and his likes and dislikes. 5. Plan together certain daily routines that save time. 6. Look for better ways of doing daily work. 7. Discuss the importance of good work habits. Concentrate on a few at a time so that they can be developed properly. 8. Show that the use of good work habits results in time saved for doing special projects. 9. Discuss ways in which the children can note improvements in their work. Keep samples for future reference. 	<p><i>Book</i></p> <p>Bauer, W.W., <i>et al. Health for All</i> (1-3).</p> <p><i>Pamphlets</i></p> <p>"Don't Push Me!" Association for Childhood Education International.</p> <p>"Helping Children Toward Freedom of Expression." Early Childhood Education Council of New York.</p>
<p><i>Character development is influenced by responsible behavior.</i></p>	<ol style="list-style-type: none"> 1. Tell the children to get a drink of water without first lining up. Discuss the situation and look for better ways of proceeding. 	<p><i>Books</i></p> <p>Byrd, Oliver E., <i>et al. Health</i> (1-3).</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	2. Have the children put on a puppet show, illustrating traits which develop character (courtesy, honesty, self-reliance, sociability, cooperation).	Riwickim-Brick, Anna. <i>Dirk Lives in Holland</i> . <i>Film</i>
	3. Discuss the importance of respecting another person's rights and property.	<i>Kindness to Others</i> . Coronet Films.
	4. Have the class draw pictures, showing children helping others.	<i>Filmstrips</i> <i>Manners at Home</i> . McGraw-Hill Book Company. <i>Manners at School</i> . McGraw-Hill Book Company.

Area III CONSUMER AND ENVIRONMENTAL HEALTH

Field of Study CONSUMER HEALTH (Early Childhood)

Objectives

To help the pupil to:

1. Become acquainted with the variety of health products now available.
2. Become familiar with the various individuals who provide health services and products.
3. Select products wisely.

CONSUMER HEALTH (Early Childhood)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>There are many reliable health products</i></p> <ol style="list-style-type: none"> 1. Foods 2. Clothing 3. Medicine and drugs* 	<ol style="list-style-type: none"> 1. Have the pupils discuss the various health products that they use in their homes. 2. Have the pupils collect a variety of labels and then discuss what these labels tell about the food that is inside the container. 	<p><i>Book</i></p> <p>Kieve, A. <i>Magic, Faith and Healing.</i></p> <p><i>Teaching Unit</i></p> <p><i>Defenses Against Quackery.</i> American Medical Association.</p>
<p><i>Some products do not contribute to good health.</i></p> <ol style="list-style-type: none"> 1. Fad foods 2. Dangerous toys 3. Medicines and drugs <p><i>Health products are packaged for cleanliness and safety.</i></p> <p><i>Foods and medicines are preserved through the use of refrigeration and rapid transportation.</i></p>	<ol style="list-style-type: none"> 1. Have the pupils identify some products that do not contribute to good health. 2. Have the pupils visit a local grocery store and identify the various methods of food packaging and protection. 3. Discuss ways in which fresh and frozen foods are transported to protect the health of the consumer. 	
<p><i>Many people provide reliable health products and services.</i></p> <ol style="list-style-type: none"> 1. Individuals <ol style="list-style-type: none"> a. Grocer b. Pharmacist c. Nurse, doctor, dentist 2. Services <ol style="list-style-type: none"> a. Hospitals b. Clinics c. School insurance 	<ol style="list-style-type: none"> 1. Have the pupils visit a pharmacy and identify the various health products available. 2. Invite the school nurse, physician, or dentist to speak to the class concerning reliable health services and products. 3. Discuss school insurance at the time when children pay for school insurance at the beginning of the year. 	<p><i>Books</i></p> <p>Dudley, N. <i>Linda Goes to the Hospital.</i></p> <p>Meeker, A. <i>How Hospitals Help Us.</i></p> <p>Memling, C. <i>We Went to the Doctor.</i></p> <p>Pyne, M. <i>The Hospital.</i></p> <p>Thompson, F. <i>About Doctor John.</i></p>

*See section on Drugs.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Some individuals do not provide good health products.</i></p> <ol style="list-style-type: none"> 1. Health “quacks” 2. Some strangers 	<ol style="list-style-type: none"> 1. Discuss the moral of the story <i>Jack and the Beanstalk</i>. 2. Role play a situation where a strange adult attempts to sell products to youngsters without the parents’ consent. 	<p><i>Transparencies</i></p> <p><i>Danger/Stranger.</i> D.C.A. Educational Products, Inc.</p>
<p><i>One’s health may be affected by what is purchased.</i></p> <p>Effects of advertising (TV and radio, magazines and newspapers, billboards)</p> <p><i>A wise selection of health products contributes to healthy and happy living.</i></p>	<ol style="list-style-type: none"> 1. Discuss popular advertisements children see on TV. Ask them if they have ever been disappointed with a product which the advertisements promoted. Discuss such a product. 2. Have the pupils role play a trip to a shopping center, where they select health products. Discuss the value of each. 	<p><i>Books</i></p> <p>Byrd, Oliver E., <i>et al. Health</i> (1-3).</p> <p>Irwin, Leslie W., <i>et al. Dimensions in Health Series: All About you. Growing Every Day. You and Others.</i></p>

Area IV SAFE LIVING

Field of Study SAFETY (Early Childhood)

Objectives

To help the pupil to:

1. Develop an increased awareness of hazards in the home, school, and community.
2. Understand that most accidents can be prevented.
3. Develop safety habits which will result in safe behavior patterns.
4. Acquire an appreciation for the many individuals who are helping him live safely.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>An awareness of the importance of safety to oneself and others will create a safer environment.</i>		
1. Safety at home <ul style="list-style-type: none"> a. Toys, equipment, and other hazards b. Electrical equipment and outlets 	1. Discuss why safety at home is important. Identify the kinds of accidents which are common at this age level.	<i>Books</i> Irwin, Leslie W., et al. <i>You and Others</i> . Stack, Herbert, and Elkow, J. Duke. <i>Education for Safe Living</i> .
2. Safety in the neighborhood <ul style="list-style-type: none"> a. Play areas b. Strangers c. Pets 	2. Discuss consideration for the safety of others in the home and the neighborhood.	
3. Safety to and from school <ul style="list-style-type: none"> a. Walking b. Riding (bicycle, car, bus) 	3. Demonstrate the correct use of common electrical equipment.	<i>Films</i> <i>Primary Safety on the School Playground</i> . Coronet Films.
4. Safety at school (gymnasium, corridors, playgrounds)	4. Prepare an exhibit of hazardous objects or pictures depicting such objects found in the home.	<i>The Safest Way</i> . American Automobile Association.
	5. Discuss storage and proper use of such hazardous items as knives, metal toys, and scissors.	<i>Safety to and from School</i> . Young American Films, Inc.
	6. Have the children make posters, showing accidents which can occur on the stairs.	<i>Street Safety for Primary Grades</i> . Eastman Kodak Company.
	7. Discuss the reasons for avoiding strange dogs and cats. Talk about the "leash law" in the community.	<i>10 Otto the Auto Films</i> . American Automobile Association.
	8. Dramatize what to do in different situations when approached by a stranger.	<i>Filmstrips</i> <i>Be a Better Pedal Pusher</i> . Society for Visual Education, Inc.
	9. Have the pupils talk about safety hazards in the neighborhood. Discuss how these can be eliminated.	<i>Best Route to School</i> . American Automobile Association.
	10. Discuss the hazards of discarded refrigerators.	<i>Look Both Ways</i> . American Automobile Association.
	11. Dramatize what to do if a ball goes into the street.	<i>Playing Safely</i> . Young American Films, Inc.
	12. Take a walk to the nearest overhead electric lines. Discuss the hazard of touching any fallen wires or flying kites near power lines.	<i>Safe and Sound at Home</i> . Society for Visual Education, Inc.
	13. Identify potential hazards and the safest routes between the playground and school. Draw a map of these routes.	<i>Walt Disney Safety Tales</i> . Encyclopaedia Britannica Educational Corp.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
		<i>Guides</i>
		<i>10 Traffic Safety Guides.</i> American Automobile Association.
		<i>Pamphlets</i>
		"School Bus Safety Rules." Massachusetts Safety Council.
		"Terry the Tricycle." American Automobile Association.
		<i>Posters</i>
		<i>School Safety Poster Packets.</i> Massachusetts Safety Council.
		<i>Stories</i>
		<i>10 Otto the Auto Stories for Teachers of Primary Grades.</i> American Automobile Association.
		<i>Transparencies</i>
		<i>Safety Signs on Our Street.</i> D.C.A. Micro-Study Units.
	14. Have the children make miniature traffic lights. Dramatize crossing at intersections and discuss the safest ways to cross streets.	
	15. Construct an intersection and have the children use toy automobiles to dramatize safety situations.	
	16. Have the children make traffic-sign posters. Role play situations which stress responding to signs they may find in their neighborhood.	
	17. Have the children make a list of bicycle inspection dates.	
	18. Plan a bicycle safe-riding course with the help of the local police department.	
	19. Discuss the use of automobile safety belts.	
	20. Role play riding to school safely as a car passenger (entering and leaving on the curbside; waiting until everyone is seated before closing the door).	
	21. Role play good conduct on the bus (entering, riding, and leaving).	
	22. Have the children make bus-safety posters early in the school year.	
	23. Practice school bus drills for emergency situations.	
	24. Take a tour of the school building. Discuss the safest ways to enter and leave the building.	
	25. During recess visit school play areas, and watch the other children at play. Discuss the safe-play areas and use of playground equipment.	
	26. Have the children make posters of school playground safety scenes.	

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<p>27. Have the physical education teacher demonstrate the safe use of equipment on the playground.</p> <p>28. Demonstrate the safe use of classroom materials.</p> <p>29. Discuss general safety practices in the classroom.</p> <p>30. Have a patrol boy and patrol girl discuss and demonstrate their jobs. Have the children draw pictures of the safety patrol working.</p>	
<p><i>Safety rules are necessary for the protection of life and property.</i></p> <ol style="list-style-type: none"> 1. Courtesy and good conduct essential 2. Obeying those in authority important 	<ol style="list-style-type: none"> 1. Discuss the procedure to follow when a hazard is discovered. 2. Discuss how following safety laws and regulations help the policeman, fire fighters, and hospital employees. 3. Discuss how following safety rules and regulations help our families and friends. 4. Role play how the lack of courtesy can cause a hazard (at the drinking fountain, on the stairs). 5. Discuss safety practices in the lunch room and other school rooms used by the children. 	<p><i>Books</i></p> <p>Byrd, Oliver E., <i>et al. Health</i> (1-3).</p> <p>Irwin, Leslie W., <i>et al. Dimensions in Health Series: All About You.</i></p>
<p><i>Each person has a responsibility in accident and fire prevention.</i></p> <ol style="list-style-type: none"> 1. Accident prevention 2. Fire prevention (causes) 3. Fire protection <ol style="list-style-type: none"> a. Fire department b. Fire drills c. Fire equipment 	<ol style="list-style-type: none"> 1. Draw pictures, showing ways to prevent accidents. 2. Discuss the hazards of wet floors. 3. Discuss an actual accident in the home and how it could have been prevented. 4. Develop a home safety checklist with the children. Have them take it home. 5. Discuss individual responsibility in reporting accidents. 	<p><i>Book</i></p> <p>Schneider, Robert E. <i>Methods and Materials of Health Education.</i></p> <p><i>Guide</i></p> <p><i>Suggested Guide for Safety Instruction: Fire Prevention.</i> American Red Cross.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<ol style="list-style-type: none"> 6. Develop a "Code of Prevention." 7. Have a few children make a scrapbook of fire stories reported in the local newspaper. 8. Discuss the causes of local fires and how they could be prevented. 9. Invite a firefighter to discuss how to prevent fires. 10. Role play how good housekeeping habits can prevent fires. 11. Show the children the various fire alarms in and around the school. Discuss their use and emphasize the dangers of sounding false alarms. 12. Have the pupils participate in a "Fire Protection Hunt" in the school, noting where various pieces of fire protection equipment are located. Write a creative story about a particular piece of equipment, its location and importance. 	<p><i>Pamphlet</i></p> <p>"Fire Safety - For Teachers of Primary Grades." National Education Association.</p>
<p><i>Safety the year round is important.</i></p> <ol style="list-style-type: none"> 1. Winter safety <ol style="list-style-type: none"> a. Sledding b. Skating c. Skiing d. Snowmobiling 2. Summer safety <ol style="list-style-type: none"> a. Swimming b. Boating and canoeing c. Camping d. Flying kites 3. Holiday safety <ol style="list-style-type: none"> a. Halloween 	<ol style="list-style-type: none"> 1. Identify the safe places in the neighborhood for winter play activities. 2. Plan bulletin boards with the children, showing safe activities for winter and summer. 3. Take the pupils on a field trip or picnic to the nearest swimming area. Discuss the safety regulations for swimming and boating. 4. Discuss the importance of safety just prior to a given holiday season. 	<p><i>Filmstrip</i></p> <p><i>Safety at Christmas.</i> Young American Films, Inc.</p> <p><i>Pamphlets</i></p> <p>"Skiing Safety." Massachusetts Safety Council. "Swimming." Massachusetts Safety Council.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
b. Christmas c. Independence Day (fireworks)		
<i>Skill development is essential in meeting and handling emergencies.</i>	<ol style="list-style-type: none"> 1. Identify and list emergency situations. 2. Discuss and role play some of these situations. Discuss steps to take in the event of a given emergency. 3. Have the children practice making emergency telephone calls. 4. Pretend there is fire in a home and have the children dramatize the situation. 5. Discuss what should be done if someone has swallowed poison. 6. Identify the nearest poison center. Have each child make a telephone dial with the telephone number in the center of the dial. The children can take these dials home. 7. Make a list of people and their telephone numbers who can help in an emergency. Have the children take the list home. 	<p><i>Book</i></p> <p>Irwin, Leslie W., et al. <i>Dimensions in Health Series: Growing Every Day.</i></p> <p><i>Pamphlet</i></p> <p>"Ten Little Tasters." Imagination, Inc.</p>
<i>There are individuals and groups of people working to promote safety for all.</i>	<ol style="list-style-type: none"> 1. Discuss the ways in which policemen help others (help train school safety patrols, direct traffic, see that people obey traffic laws, etc.). 2. Discuss the jobs of the sanitary and the food inspectors and how they help us. 3. Discuss the roles of Registry of Motor Vehicles inspectors, fire inspectors, etc., in keeping homes and communities safe. 4. Invite as many of the above officials as possible to class to tell about their jobs. 	<p><i>Book</i></p> <p>Grout, Ruth E. <i>Health Teaching in Schools.</i></p>

MIDDLE GRADES

Area I PHYSICAL HEALTH

Field of Study NUTRITION

Objectives

To help the pupil to:

1. Learn about the nutrients of the basic four food groups and how they relate to the body.
2. Appreciate the value of a well-balanced diet for optimum health.
3. Understand the process of digestion.
4. Become aware of the network of industries involved in supplying food to the public.
5. Develop an understanding of food habits and customs in other countries.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The nutrients supplied by the basic four food groups keep us healthy.</i></p> <ol style="list-style-type: none"> 1. Needed for growth and development 2. Can appear in different forms <p><i>Definite amounts of foods from the basic four food groups are needed daily.</i></p> <ol style="list-style-type: none"> 1. Milk and meat groups (important for growth) 2. Proteins (build and repair body cells) 3. Carbohydrates (chief fuel foods) 4. Fats (supply over twice as much energy per gram as carbohydrates) 5. Vitamins <ol style="list-style-type: none"> a. Help maintain body tissue b. Help prevent dietary deficiency diseases 6. Minerals <ol style="list-style-type: none"> a. Build bones and teeth b. Help regulate body processes c. Help prevent dietary diseases 7. Water (essential to diet) 	<ol style="list-style-type: none"> 1. Review the basic four food groups, the foods included in each group, and the amounts recommended. 2. Discuss the terms <i>nutrition</i>, <i>nutrients</i>, and <i>calories</i>. 3. List foods which appear in different forms when cooked. For example: eggs — fried, scrambled, and boiled. 4. Have the pupils construct a basic four food mobile. 5. Have the pupils make posters of foods they ate for lunch, and classify them according to food group. 6. Plan a spelling bee of nutrition terms. 7. Have the pupils report on the functions of nutrients and on food sources. 8. Have the pupils relate food sources of vitamins to the Basic Four Guide. 9. Discuss dietary deficiency diseases and their causes. 10. Have the pupils report on the functions of water in the body. 11. Have the pupils do research and report on where the community obtains its supply of water. Precautions taken to insure a safe supply should be included. 	<p><i>Book</i></p> <p>Leverton, Ruth M. <i>Food Becomes You</i>.</p> <p><i>Films</i></p> <p><i>What's Good to Eat? Food That Builds Good Health.</i> New England Dairy and Food Council.</p> <p><i>Mobile</i></p> <p><i>A Basic Breakfast Pattern.</i> Cereal Institute, Inc.</p> <p><i>Pamphlets</i></p> <p>"Get Aboard the Good Ship Vitamin C." Florida Citrus Commission.</p> <p>"Guide to Good Eating." New England Dairy and Food Council.</p> <p>"The Nutrition Ladder to Better Health." Florida Citrus Commission.</p>
<p><i>The "type A" lunch contributes one-third of the daily food needs.</i></p> <ol style="list-style-type: none"> 1. "Type A" lunch requirements established by federal government 	<ol style="list-style-type: none"> 1. Have the pupils examine the school lunch menu and analyze it for the basic four food groups. 2. Arrange a tour of the kitchen with the food 	<p><i>Films</i></p> <p><i>Food, Energy and You.</i> New England Dairy and Food Council.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p>2. Daily servings</p> <ol style="list-style-type: none"> Two ounces of protein food Three-fourths cup each of two or more vegetables or fruit or both Serving of whole-grain or enriched bread One teaspoon of fortified margarine or butter One-half pint of whole unflavored milk <p><i>When eaten, food is broken down and changed in the body.</i></p> <ol style="list-style-type: none"> Digestion begins in mouth Healthy teeth important for proper digestion <p><i>Science has helped to increase man's food supply, improve the quality of food, and make food safe to eat.</i></p> <p><i>Many people cooperate to bring food to the consumer.</i></p> <ol style="list-style-type: none"> Food industry relates to most other industries Environment determines foods to be grown Inter-continental cooperation necessary to service world population 	<p>service supervisor to learn where foods come from, how foods are stored, and how meals are prepared.</p> <ol style="list-style-type: none"> Have the pupils write a thank-you note to the cafeteria personnel after their visit. Have the pupils make a poster of the digestive system and show where food is broken down. Discuss what teeth do to food. Assign individuals to report on such famous men in the food field as Spallanzani, Appert, van Leeuwenhoek, Pasteur, Funk, Underwood, Birdseye. Have the pupils make a display of various types of food packaging. Take a field trip to a supermarket and have the manager speak to the class. The pupils can make a list of the types of foods and packaging materials that they noticed. Visit a farm, dairy, and food processing plant. Report on how food is grown, harvested, and processed. Make a map showing where certain types of foods are grown in the United States. Given reasons why they are grown in those areas. List foods imported and exported by the United States. Have the pupils report on regional foods. If possible, have a tasting party, serving such things as Southern style corn bread, New York style clam chowder, and chili. Have the pupils discuss how climate relates to food eaten. 	<p><i>How Food Becomes You.</i> New England Dairy and Food Council.</p> <p><i>Nutrition in Tooth Formation and Dental Caries.</i> American Medical Association.</p> <p><i>What Do We Know About Teeth?</i> New England Dairy and Food Council.</p> <p><i>Pamphlets</i></p> <p>"Dairy Foods in the U.S.A." Area II MENTAL AND SOCIAL HEALTH

Field of Study ALCOHOL (Middle Grades)

Objectives

To help the pupil to:

1. Become aware of the fact that the use of alcohol is traditional.
2. Understand why some people drink alcohol and others abstain.
3. Develop an understanding of the differences in the terms *abstinence*, *drinking*, and *drunkenness*.
4. Understand current, factual information about alcohol.
- *5. Appreciate that there are various psychological aspects involved with the excessive use of alcohol.
6. Understand the responsibilities and consequences related to alcohol use.
7. Develop an awareness of the influences in their lives which affect their decision-making about alcohol.

* See sections on Emotional Development and Drugs.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Alcoholic beverages have been used by man for many centuries.</i>	<ol style="list-style-type: none"> 1. Early man <ol style="list-style-type: none"> a. Stone age b. Moslems c. Area II MENTAL AND SOCIAL HEALTH

Field of Study DRUGS (Middle Grades)

Objectives

To help the pupil to:

1. Develop an understanding of the historical background of drugs.
2. Acquire a healthy respect for drugs and their tremendous value to mankind when used correctly.
3. Comprehend the possible physical, mental, and moral dangers involved in the use of drugs.
- *4. Become acquainted with the various environmental factors which could easily influence an individual's decisions with regard to drug use and/or abuse.
5. Appreciate the national and state laws regarding the distribution and use of drugs.
6. Realize the effects of drugs on the body, and acquire a basis upon which to build decision-making abilities.

* See section on Emotional Development.

DRUGS (Middle Grades)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The use of drugs has made a valuable contribution to the historical development of man.</i></p> <ol style="list-style-type: none"> Asia (China) <ol style="list-style-type: none"> Used as a medication Opium War (cause and results) India, Turkey (medical and religious uses through the ages) Africa (South Africa, Egypt) North America (United States, Mexico) South America Europe (England, France) Greco-Roman 	<ol style="list-style-type: none"> Form committees of pupils to do research on the history of drugs in each of the countries mentioned. Have a member of each committee report on what his committee has learned. Have the pupils dramatize what they have found out concerning the history of drugs in the various countries. Make bulletin board displays of drugs which early man used and drugs of today. Assign individuals to do research and report on such men in the drug field as Alexander Flemming and William Norton. Trace the history and development of a modern day drug from ritual or tribal usage to modern medical applications (heroin, morphine, etc.). Have the pupils do research on poisonous plants such as mushrooms. 	<p>Books</p> <p>American School Health Association. <i>Teaching About Drugs</i>.</p> <p>Modell, Walter, and Lansing, Alfred. <i>Drugs</i>.</p> <p>Hyde, Margaret. <i>Mind Drugs</i>.</p> <p>Read, Donald. <i>Drugs and People</i>.</p> <p>Filmstrip</p> <p><i>Narcotics: Background Information</i>. Area II MENTAL AND SOCIAL HEALTH

Field of Study TOBACCO (Middle Grades)

Objectives

To help the pupil to:

1. Understand the history of the use of tobacco and its culture here and abroad.
2. Become aware of the effects of smoking on his health and appearance.
3. Comprehend that smoking is economically unsound for the individual.
4. Understand that one does not have to smoke to be socially accepted by peers.

TOBACCO (Middle Grades)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The use of tobacco has historical significance socially and economically.</i></p> <ol style="list-style-type: none"> 1. Use by Indians in America 2. Introduction to Europe 3. Early growth 4. Present growth 5. Economic impact <ol style="list-style-type: none"> a. Present use b. Export c. Federal and state taxes 	<ol style="list-style-type: none"> 1. Have committee reports on the early use of tobacco in this country and other countries. 2. Have the pupils make displays of the different ways that tobacco is used in different countries. 3. Have the pupils study the difference in tobacco grown in this country and that grown in other lands. 4. Hold a debate or panel discussion on how early tobacco growers in this country depleted the land. 5. Discuss tobacco growing in the Connecticut River Valley and its economic impact on this region. Find out if other use can be made of this land. 6. On a map of the world and/or the United States, indicate by the use of color the tobacco-growing regions. 7. Discuss the amount of tax on each package of cigarettes (federal and state) and relate it to the economy of the country. 8. Have the pupils build resource units and keep them in the resource center of the school to be used and added to yearly. 	<p><i>Books</i></p> <p><i>Collier's Encyclopedia</i>. Vol. 22.</p> <p><i>Compton's Pictorial Encyclopedia</i>. Vol. 14.</p> <p><i>Encyclopaedia Britannica, Jr. for Boys and Girls</i>. Vol. 14.</p> <p><i>Encyclopedia Americana</i>. Concepts and Primary Concerns	Sample Learning Experiences	Resources
2. Influences that motivate individuals not to smoke <ul style="list-style-type: none"> a. Example of adults b. Peer influence c. Respect for the law d. Respect for one's body e. Strength of character f. Advertising <ul style="list-style-type: none"> (1) Cancer and Heart Association (2) Respiratory and Disease Association g. Athletics 	6. Have each pupil compile a list of his friends and relatives and conduct a survey on their attitudes toward smoking.	<i>Transparencies</i> <i>Substances that Modify Mood and Behavior.</i> 3M Company.

Area III CONSUMER AND ENVIRONMENTAL HEALTH

Field of Study CONSUMER HEALTH (Middle Grades)

Objectives

To help the pupil to:

1. Understand the individual's role and responsibility as a consumer of health products.
2. Develop an awareness of the problems that tend to prevent wise consumer choices.
3. Use discriminating judgment in the selection of health products and services.
4. Understand the importance of carefully spending the health dollar.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The health consumer has a variety of needs.</i></p> <ol style="list-style-type: none"> 1. Health consumer buys or uses <ol style="list-style-type: none"> a. Health services b. Health facilities c. Health products 2. Responsible health consumer <ol style="list-style-type: none"> a. Seeks the best services b. Demands conservative prices c. Expects good quality in services and products 	<ol style="list-style-type: none"> 1. Discuss the kinds of health services used by different families. 2. Have the pupils consult newspapers for comparative price lists and bring them to class for discussion. 3. Have the pupils prepare individual or group reports on consumer health articles or products found in magazines. 	<p><i>Book</i></p> <p>Trump, Fred. <i>Buyer Beware</i>.</p>
<p><i>The consumer of health products is constantly faced with making decisions.</i></p> <ol style="list-style-type: none"> 1. Drugs and medicines* <ol style="list-style-type: none"> a. Prescription medicines b. Non-prescription medicines <ol style="list-style-type: none"> (1) Examination of labels (2) Limitations of labeling 2. Health foods 3. Equipment and devices <ol style="list-style-type: none"> a. Legitimate b. Harmful or useless 4. Cosmetics and other substances 5. Health Services <ol style="list-style-type: none"> a. Seeking assistance from medical doctors <ol style="list-style-type: none"> (1) Family doctors (2) Allergist (3) Dermatologist (4) Ophthalmologist (5) Pediatrician (6) Psychiatrist 	<ol style="list-style-type: none"> 1. Have the pupils identify over-the-counter preparations such as cough drops, aspirins, and cold tablets, which may be harmful if taken over an extended period of time. 2. Define or distinguish between the terms <i>fortified</i>, <i>enriched</i>, <i>homogenized</i>, and <i>additives</i>. 3. Display pictures of gadgets and devices sold by quacks. 4. Have a child find the name of a medical specialist in the telephone book. Invite the specialist to visit with the class or arrange for a child to visit and interview the specialist and report to the class. 5. Discuss eyeglasses and the importance of having a qualified person prescribe them. 6. Have a committee study the non-medical specialists and report to the class. 7. Discuss the meaning of M.D. and other uses of the title of <i>doctor</i>. 8. Discuss some of the common physical problems 	<p><i>Articles</i></p> <p>"Do Cold Cures Really Work!" <i>Today's Health</i>. January, 1961.</p> <p>"Doctors Who Helped Win the West." <i>Today's Health</i>. September, 1964.</p> <p>"Granny Had a Cure for Everything." <i>Today's Health</i>. 7. Fallacies about health products <ol style="list-style-type: none"> a. Health fads b. Superstitions c. Nostrums 	1. Discuss the percentage of the dollar spent on medical and health products. 2. Have the pupils compare the prices of the same products obtained in different stores. 3. Discuss the various types of medical services which are provided by the local health department for members of the community.	<i>Article</i> "Consumer Education for the Young Buyer." <i>Today's Health.</i> March, 1967. <i>Book</i> Willgoose, Carl E. <i>Health Education in the Elementary School.</i>
<i>The young buyer must spend his money wisely.</i> <ol style="list-style-type: none"> 1. Making the most of the health dollar (knowing before buying) 2. Assuming responsibility for one's own health 3. Utilizing public health services <ol style="list-style-type: none"> a. Rabies clinic 		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
b. Measles clinic c. Eye examinations d. Chest X-rays e. Dental care 4. Having knowledge of school health and accident insurance	Discuss how these services can be effectively used by community members and how they are often abused. 4. Have the class discuss the school health and accident insurance and its purpose. 5. Stimulate discussion on the budget make-up of the local health board.	<i>Filmstrip</i> <i>Dollars for Health.</i> Institute on Life Insurance <i>Transparencies</i> <i>Consumer Protection Sources.</i> 3M Company.
<i>Health advertisements and promotions have a marked influence on buying habits.</i> 1. Purposes of advertising a. Increase consumer demand for certain products b. Reach the consumer (brainwashing) 2. Responsibility of advertising a. Making truthful claims b. Presenting messages in good taste c. Presenting accurate facts 3. Irresponsible techniques of advertising a. Reach the emotions rather than reason b. Present inaccurate facts (1) Misleading claims and statements (2) Incorrect word usage to confuse the buyer (3) Testimonials (4). Gurrantees c. Deceptive packaging d. Exploitation of special groups (1) Children (2) Teen-agers (3) Housewives	1. Have pupils make a guide for evaluating health advertising. Have them re-evaluate their guide several months later. 2. Bring in a health product and have the pupils discuss the label and decide whether or not it is worth purchasing. 3. Make some tape recordings of radio and TV commercials relating to children's health. Have the pupils discuss the tapes. 4. Have the pupils make a bulletin board display of advertisements which they have collected, showing how advertisements attempt to play on the emotions. 5. Have the pupils discuss the points to consider in reaching a decision to purchase various products. Consider the following: (1) Quality of the product. (2) Comparable price of similar items. (3) The safety of the product. (4) Accuracy of statements. (5) Need for the product. (6) Conservative advertising. 6. Display advertisements aimed at specific age levels. 7. Invite the advertising editor of a local newspaper to speak to the class about criteria	<i>Film</i> <i>The Meanest Crime.</i> Food and Drug Administration. <i>Pamphlet</i> "Bait Ads that Hook Your Dollars." Better Business Bureau. "Facts You Should Know About Your Better Business Bureau." Better Business Bureau. <i>Transparencies</i> <i>Influence on Health Choices.</i> 3M Company.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Many health agencies and organizations are working to protect the health dollar.</i></p> <ol style="list-style-type: none"> 1. Local Better Business Bureau 2. State agencies 3. Federal agencies 	<p>for accepting health products and health service advertising.</p> <ol style="list-style-type: none"> 1. Invite a representative from the local Better Business Bureau to discuss the role of the organization in the community. 2. Have the pupils set up their own set of rules which they believe all merchants, advertisers, etc., should be compelled to follow. Discuss the feasibility of each rule. 3. Compile a list of community sources where reliable and accurate health information can be obtained. 4. Visit a Food and Drug Administration Laboratory if there is one in the vicinity. 	<p><i>Book</i> Neal, Harry. <i>The Protectors – The Story of The Food and Drug Administration.</i></p> <p><i>Pamphlet</i> “Consumer’s Union Special Publications.” Consumer’s Union of the United States.</p>

Area IV SAFE LIVING

Field of Study SAFETY (Middle Grades)

Objectives

To help the pupil to:

1. Develop an awareness of hazards.
2. Develop the ability to deal with situations in the environment that are potentially dangerous.
3. Understand that safety precautions and procedures are the responsibility of everyone.
4. Realize that most accidents are the result of carelessness and/or preoccupation or emotional stress.
5. Develop an appreciation of the importance of safe living in a changing environment.

SAFETY (Middle Grades)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Since hazards lurk everywhere, the important thing is to recognize and correct them.</i></p> <ol style="list-style-type: none"> Home safety <ol style="list-style-type: none"> Fires Burns Critical areas School safety (to and from) <ol style="list-style-type: none"> Riding Walking Community safety Recreation safety 	<ol style="list-style-type: none"> Elect safety patrols to inspect various parts of the building. Have them report any safety hazards they might find and discuss ways in which these hazards may be eliminated or minimized. Have the pupils draw a map of the routes they follow to and from school. They should note any hazards along the way. List the areas in the home where hazards are easily overlooked. Discuss hazards involved in talking or riding with strangers. List sources of recreation that have hidden hazards (kite flying). 	<p><i>Films</i></p> <p><i>Better Safe than Sorry.</i> McGraw-Hill Book Company.</p> <p><i>Let's Be Safe at Home.</i> McGraw-Hill Book Company.</p> <p><i>Pamphlets</i></p> <p>"Helpful Hints on Bicycle Care." JUNIOR HIGH

Area I. PHYSICAL HEALTH

Field of Study NUTRITION

Objectives

To help the student to:

1. Understand the importance of food in every stage of life.
2. Become aware of the influence of nutritional habits on personal growth and development.
3. Develop an understanding of the importance of handling food safely.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Individuals vary in their rate of physical development.</i>	<ol style="list-style-type: none"> 1. As a basis for class dialogue have each student write a brief physical self-description. Discuss the factors related to nutritional requirements and physical-growth rates of various age groups. 2. Initiate class discussion by showing pictures of people suffering from malnutrition (Appalachia, Biafra). 3. Some students may be interested in doing historical research on man's physical growth and development (Plimoth Plantation). 	<p><i>Books</i></p> <p>Bogert, L.J., et al. <i>Nutrition and Physical Fitness</i>. Clair, C. <i>Kitchen and Table – A Bedside History of Eating in the Western World</i>. Mickelsen, Olaf. <i>Nutrition, Science and You</i>.</p> <p><i>Film</i></p> <p><i>Food for Life</i>. New England Dairy and Food Council.</p> <p><i>Pamphlet</i></p> <p>"Vitamins from Food." New England Dairy and Food Council.</p>
<i>Each stage of physical development requires the same nutrients in varying amounts.</i>	<ol style="list-style-type: none"> 1. To review intake of nutrients, have each student complete a 24-hour dietary intake chart. Examine the food against the criteria of the basic four. 2. Use Comparison Cards to illustrate quantity and quality of nutrients in common foods (milk versus cola or coffee). 3. List some popular snack foods. Evaluate these for their nutritive value. 4. Have a snack party, allowing the students to plan their own snacks and record them on recipe cards. Discuss the nutritive value of each snack. 5. On a given day, have the students evaluate the breakfast and/or lunch they have eaten. 	<p><i>Book</i></p> <p>McWilliams, M. <i>Nutrition for the Growing Years</i>.</p> <p><i>Comparison Cards</i></p> <p>New England Dairy and Food Council.</p> <p><i>Films</i></p> <p><i>Exploring Your Growth</i>. Local health departments (established to implement and amplify specific state and federal laws relating to foods) 		

Area II MENTAL AND SOCIAL HEALTH

Field of Study ALCOHOL (Junior High)

Objectives

To help the student to:

1. Become aware of current facts about alcohol and its use.
2. Understand the emotional, social, and psychological effects of alcohol beverages on the individual.
3. Understand alcoholism and its causes.
4. Understand his own attitude about drinking.
5. Develop an understanding of the responsibilities and consequences associated with the decisions which are made about the use or non-use of alcohol.
6. Become aware of the various community agencies and services concerned with alcohol and alcoholism.

Concepts and Primary Concerns	Sample Learning Experiences	Resources	
<i>People have many misconceptions about alcohol.</i>			
1. Aid to appetite	1. Administer a Basic Information Checklist. (See Resources.)	<i>Pamphlets</i> "Facts About Alcohol." (Basic Information Checklist.) Science Research Associates. "Thinking About Drinking." Massachusetts Department of Public Health. Division of Alcoholism.	
2. A stimulant	2. Administer yes/no questionnaire in "Thinking About Drinking" pamphlet. (See Resources.)		
3. Relief for colds and fever			
<i>There are different types of alcohol used today.</i>			
1. Ethyl alcohol (source, uses)	1. Have the students make a checklist of the types of alcohol found in their homes.	<i>Books</i> Keller, Mark. <i>How Alcohol Affects the Body</i> . McCarthy, Raymond. <i>Alcohol Education for the Classroom and Community</i> . <i>Transparencies</i> <i>Beverage Alcohol Content</i> . D.C.A. Educational Products, Inc. <i>Damage to Body Organs</i> . D.C.A. Educational Products, Inc.	
2. Methyl alcohol – a dangerous poison (source, uses)	2. Have the students identify the percentage and/or proof of alcohol content of various beverages.		
3. Alcoholic beverages	3. Discuss why methyl alcohol is potentially fatal.		
a. Beer, 2-5% alcohol	4. Discuss the methods of fermentation and distillation in making alcoholic beverages.		
b. Wine, 10-14% alcohol	5. Prepare a report on the chemistry of alcohol.		
c. Whiskey, 40-50% alcohol			
<i>The use of alcohol has varying effects on the body.</i>			
1. Physiological effects	1. Define and relate to alcohol the terms <i>sedative</i> , <i>narcotic</i> , <i>anesthetic</i> , <i>depressant</i> , <i>analgesic</i> .	<i>Books</i> Block, Marvin. <i>Alcoholism</i> . Byrd, Oliver E., et al. <i>Health</i> (7-8). Cain, Arthur. <i>Young People and Drinking</i> . Lewis, David C. <i>Alcohol, Barbiturates, Tranquilizers</i> .	
a. Absorption	2. Discuss the differences in the digestion and absorption of food and alcohol.		<i>Pamphlet</i> "Facts about Alcohol." Science Research Associates.
(1) Alcohol concentration	3. Use schematic drawings and charts to trace the absorption of alcohol by the body.		
(2) Presence of food in stomach	4. Give alcohol in varying amounts to experimental animals such as white mice and observe their behavior and movement.	<i>Film</i> <i>Brain Is the Reason</i> . National Women's Christian	
(3) Speed of drinking			
(4) Body weight			
b. Metabolism			
c. Nervous system			
d. Liver			
e. Circulatory system			
f. Resistance to infection			
g. Skilled performance			

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p>2. Psychological effects</p> <ol style="list-style-type: none"> Overconfidence Depression Guilt 		<p>Temperance Union.</p> <p><i>Transparencies</i></p> <p><i>Concentration Build-Up in Blood.</i> D.C.A. Educational Products, Inc.</p>
<p><i>Alcoholism is a chronic disease and/or behavioral disorder.</i></p> <p><i>The causes of alcoholism are still being researched.</i></p> <ol style="list-style-type: none"> Physiological factors <ol style="list-style-type: none"> Allergy Metabolism Nutritional and hormonal deficiencies Hereditary factors Psychological factors <ol style="list-style-type: none"> further research needed personality development plays a part communication between family members Sociological factors (cultural differences) Environmental factors <ol style="list-style-type: none"> Role of school and community Alcohol consumption and rate of alcoholism not consistent Symptoms of alcoholism <ol style="list-style-type: none"> Drinks more and more often Blacks out Drinks secretly Drinks rather than eats Drinks rapidly 	<ol style="list-style-type: none"> Discuss the observable changes which occur in a person as the alcohol level in his blood increases. Have the students identify alcohol as a drug and its effect as a depressant. Discuss the relationship between excessive drinking and physiological changes in the body. Discuss the statement "The body rids itself of alcohol without digesting it and using it like other foods." Have the students do research on the statement "All individuals do not react to alcohol the same way." Have each student write a definition of an alcoholic in less than 25 words. Discuss the contributions made by the students. 	<p><i>Books</i></p> <p>Gmur, Fodor, <i>et al. Making Health Decisions.</i></p> <p>Greenburg, Leon A. <i>What the Body Does with Alcohol.</i></p> <p>Irwin, Leslie W., <i>et al. Educational Products, Inc.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>The individual has a responsibility to himself and to society with regard to the use of alcohol.</i>		
1. Responsibility to oneself <ol style="list-style-type: none"> Seeks out accurate information Self-evaluation of drinking practices <ol style="list-style-type: none"> Reasons for Drinking Frequency Degree 	1. Have a discussion on individual and community responsibility. 2. Organize student groups to discuss how to cope with feelings of loneliness, worthlessness, anger, and the need to escape. (See Emotional Development section.) 3. Discuss and then role play the social and personal implications of refusing a drink. 4. Invite a law-enforcement officer to visit and discuss the use of alcohol as it relates to breaking the law.	<i>Books</i> Chafetz, Morris E. <i>Liquor the Servant of Man</i> . Hough, Henry B. <i>An Alcoholic to His Sons</i> . <i>Film</i> <i>Alcoholism</i> . Massachusetts Department of Education. <i>Pamphlet</i> "Thinking About Drinking." Massachusetts Department of Public Health, Division of Alcoholism. <i>Transparencies</i> <i>Costs to Society</i> . D.C.A. Educational Products, Inc. <i>Damage to Family Life</i> . D.C.A. Educational Products, Inc.
2. Responsibility to others <ol style="list-style-type: none"> Family and friends The community Acceptance of those who do not drink Helps those with a drinking problem Drinking and driving 	1. Invite a member of the Division of Alcoholism to speak to the class. 2. Invite a social worker to visit the class and discuss the relationship of alcohol to various societal problems. 3. Invite a member of Alcoholics Anonymous who can relate to teen-agers to visit and discuss the problem of alcoholism.	<i>Transparencies</i> <i>Steps to Recovery</i> . D.C.A. Education Products, Inc.
<i>There are numerous agencies involved in helping to solve community problems related to alcohol and alcoholism.</i>		
1. Department of Public Health, Division of Alcoholism. 2. Department of Mental Health 3. Massachusetts Medical Society 4. Alcoholics Anonymous 5. Al-Anon-Family Group 6. Al-A-teens 7. Local police departments		

Area II MENTAL AND SOCIAL HEALTH

Field of Study DRUGS (Junior High)

Objectives

To help the student to:

1. Understand the historical background relating to the present-day use of drugs.
2. Understand the many reasons why people use drugs even though drugs effect health and behavior.
3. Understand the effects of drugs upon one's physical and mental health.
4. Make wise decisions concerning the use of drugs.
5. Explore the various laws concerned with the use and distribution of drugs.
6. Become acquainted with the various resource centers where assistance may be obtained in the area of drugs and drug related problems.

DRUGS (Junior High)

Concepts and Primary Concerns	Sample Learning Experience	Resources
<i>Drugs have been utilized to service mankind medically and spiritually.</i>		
<ol style="list-style-type: none"> 1. Narcotic analgesics (pain, fatigue, tension relievers, and synthetic opiates) 2. Depressants (sedatives, e.g., barbiturates) 3. Tranquilizers (e.g., lithium, reserpine, etc.) 4. Stimulants (amphetamines, e.g., benzedrine, methedrine, dexedrine, cocaine, etc.) 5. Hallucinogens (e.g., LSD, mescaline, psilocybin, DMT, DET, STP, marijuana, etc.) 6. Volatile solvents (delirants, e.g., glue, kerosene, gasoline) 	<ol style="list-style-type: none"> 1. Discuss popular literature in which drugs play an important role (<i>Sleeping Beauty</i>, <i>Snow White</i>). 2. Use pictures of the various tablets, capsules, etc., of different drugs to construct a poster or chart, illustrating as many common drugs as possible along with their effects, medical uses, and interesting history. 3. Invite a pharmacist to class to discuss the ways in which drugs have been used in the past to help cure disorders or relieve pain. 4. If time permits, invite the pharmacist to expand his discussion to explain the responsibilities of a druggist in drug distribution. 5. Have a panel discussion on "The ways drugs have aided mankind." 6. Invite the school nurse to speak to the class on the proper use of drugs. 7. Show the film "LSD-Insight or Insanity." 	<p><i>Films</i></p> <p><i>LSD – Insight or Insanity.</i> Bailey Films.</p> <p><i>Marijuana.</i> Bureau of Narcotics and Dangerous Drugs.</p> <p><i>Flip Charts</i></p> <p>Winston Products for Education.</p> <p><i>Pamphlets</i></p> <p>"Drug Abuse: The Empty Life." Smith, Kline and French Laboratories.</p> <p>"Drug Abuse: Escape to Nowhere." National Educational Association.</p> <p>"The Drug Experience: Psychedelics, Depressants, Stimulants, Opiates." C.S.C.S., Inc.</p> <p>"Drugs of Abuse." United States Government Printing Office.</p> <p>"F.D.A. – Drug Visual Aids." Food and Drug Administration.</p> <p>"The Glue Sniffing Problem." American Social Health Association.</p> <p>"Narcotics: Dangerous Drug Abuse, Instruction Guide." Winston Products for Education.</p> <p><i>Books</i></p> <p>American School Health Association. <i>Teaching About Drugs.</i></p> <p>Kaplan, Robert. <i>Drug Abuse: Perspectives on Drugs.</i></p>
<i>Drug use by younger people continues to become more prevalent.</i>	<ol style="list-style-type: none"> 1. Discuss the trend of the shifting of drug experimentation from college-age youth to elementary school children. 2. Review the data from the survey of the Arlington Public Schools. 3. Have students list the various substances in their homes which could be misused. 	
<ol style="list-style-type: none"> 1. Influences <ol style="list-style-type: none"> a. Inquisitiveness and experimentation b. Accessibility of chemical substances within the home (e.g., cleaning substances, glue, shellac, etc.) c. Peer group and family pressures. 		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<ul style="list-style-type: none"> d. Academic pressures directed from parents, peers, and self e. Inability to cope with reality and the physical environment (pressures, body imbalances, and environmental temperatures) 	<ul style="list-style-type: none"> 4. Assign a paper on "Why drug abuse by American youth continues to increase." 5. Discuss the inherent dangers of experimenting with drugs. 6. List the various pressures to which the class members feel they have been exposed, and discuss their feelings on the matter. 7. Radio and TV commercials, taped in advance by the teacher or students and presented to the class, will allow for a close examination of the information contained in the commercials and the approaches taken to motivate people to try various over-the-counter drugs. 8. Discuss how the human body reacts to physical and psychological stress. 9. Through student-centered discussions, construct a list of needs resulting from changes in physical environment. Follow up with some possible solutions to these problems. 10. Invite a physician to visit the class and discuss the differences between physical and psychological dependence on drugs. As a follow-up have the students list the drugs which fall into each category. 	<p><i>Film</i></p> <p><i>The Losers.</i> Bureau of Narcotics and Dangerous Drugs.</p> <p><i>Pamphlets</i></p> <p>"Arlington Report." Division of Drug Rehabilitation. Massachusetts Department of Mental Health.</p> <p>"Drug Abuse: The Chemical Cop-Out." National Association of Blue Shield Plans.</p> <p>"The Narcotic-Addiction Problem." American Social Health Association.</p> <p>"Narcotic Drug Addiction." Public Health Service Publication. United States Department of Health, Education and Welfare.</p> <p><i>Transparencies</i></p> <p><i>The Use and Misuse of Drugs.</i> D.C.A. Educational Products, Inc.</p> <p><i>Book</i></p> <p>Public Health Service Publication. <i>Resource Book for Drug Abuse Education.</i></p> <p><i>Pamphlet</i></p> <p>"First Facts about Drugs." United States Department of Health, Education and Welfare.</p>
<ul style="list-style-type: none"> 2. Possible consequences <ul style="list-style-type: none"> a. Psychological dependence b. Physical dependence c. Death 		
<p><i>Drugs are used by physicians to promote better health.</i></p> <ul style="list-style-type: none"> 1. To treat illness <ul style="list-style-type: none"> a. Physical b. Psychological 2. To prevent disease <ul style="list-style-type: none"> a. Antibiotics b. Vaccinations c. Antiseptics 		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Improper use of drugs can have a negative effect upon the individual.</i></p> <ol style="list-style-type: none"> 1. Central nervous 2. Cardiovascular 3. Respiratory 4. Gastrointestinal 5. Excretory 6. Integumentary 7. Skeleto-muscular <p><i>Organs of the body can be permanently damaged by the misuse of drugs.</i></p> <ol style="list-style-type: none"> 1. Brain 2. Heart 3. Liver 4. Kidneys <p><i>Most individuals who abuse drugs have or may develop personality problems.</i></p> <p><i>Social problems may be created through the misuse of drugs.</i></p> <ol style="list-style-type: none"> 1. Venereal diseases 2. Extramarital pregnancy 3. Psychoses 4. Serum hepatitis 5. Others 	<ol style="list-style-type: none"> 1. Using anatomical charts, describe the key body organs and the effects on these organs from the use of drugs. 2. View the film <i>Drugs and the Nervous System</i>. 3. Review tapes of drug users and accompanying transcripts. Discuss in detail the questions for discussion at the end of each. 4. Have students describe the problems of one who uses drugs or those problems that may develop in such an individual. 5. Have the students prepare a report on the effect that drug use has on the total population. 	<p><i>Books</i></p> <p>Modell, Walter, and Lansing, Alfred. <i>Drugs</i>. Van Dyke, Henry T. <i>Youth and the Drug Problems</i>.</p> <p><i>Films</i></p> <p><i>Beyond LSD</i> Massachusetts Department of Education. <i>Drugs and the Nervous System</i>. Churchill Films.</p> <p><i>Pamphlets</i></p> <p>"Data for Decision Making." C.S.C.S., Inc. "Drug Abuse: Game Without Winners." Government Printing Office. "Questions and Answers." Narcotics Addiction Control Commission.</p>
<p><i>Decision-making skills, like all skills, require knowledge and practice.</i></p> <p><i>Accurate information is paramount in the formulation of wise decisions.</i></p>	<ol style="list-style-type: none"> 1. Define the term <i>decision</i>. 2. Have students tell of recent decisions that they have made and what factors they considered in the process. 	<p><i>Books</i></p> <p>Byrd, Oliver, et al. <i>Health</i>.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Wise decision-making necessitates the separation of fact from fantasy.</i></p> <p><i>Decisions are reinforced through favorable family relationships.</i></p>	<ol style="list-style-type: none"> Review the discussion questions at the conclusion of each section in the C.S.C.S. material. Have student list common emotions that they have experienced and how they coped with them. Invite several parents to participate in a panel discussion concerning the parents' role in decision-making. Set up the following role-playing situations within the classroom: (1) two students involved in a situation where one student attempts to persuade the other to take drugs; (2) one student, assuming the role of the parent, attempts to reason with the child that drugs can cause possible harm and that experimentation should be avoided; (3) one student, assuming the role of a guidance counselor, tries to get the student who has become involved with drugs to obtain psychiatric assistance. 	<p>Irwin, Leslie W., <i>et al. Foundations for Fitness.</i></p> <p><i>Pamphlet</i></p> <p>"Answers to the Most Frequently Asked Questions About Drugs." Public Health Service. United States Department of Health, Education and Welfare.</p>
<p><i>Laws exist at the federal and state levels concerned with the possession, sale, and transportation of drugs.</i></p> <ol style="list-style-type: none"> Developed to safeguard the individual and the community Being reviewed and revised Enforcement (role of law enforcement agencies, e.g., federal, state, local) Prosecution of violators Role of the courts <ol style="list-style-type: none"> Prosecution of violators Probation and rehabilitation recommendations 	<ol style="list-style-type: none"> Provide each student with a chart of the federal and state drug laws. Discuss the laws and define the terms <i>possession</i>, <i>sale</i>, <i>transportation</i>, and <i>use</i>. Have a member of the legislature come to class to discuss pending legislation on drugs. Distribute copies of the various state laws governing drug control. Discuss the laws in detail. Discuss the reasons for laws in general and specifically drug laws. Have the local police narcotic agent come into the class to discuss local police controls on drugs. 	<p><i>Pamphlets</i></p> <p>"The Addict and the Law." Indiana University Press.</p> <p>"Federal and Massachusetts Drug Laws." Massachusetts Department of Education.</p> <p>"The Marijuana Decision." Narcotic Addiction Control Commission, New York City.</p> <p>"New Trends in Narcotic Addiction Control." Public Health Report. United States Department of Health, Education and Welfare.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<ol style="list-style-type: none"> 6. Have a member of the local district court probation department discuss the role of the court in drug cases. 7. Discuss the effect of a court record on the career of the student. 	
<i>Professional assistance is available and valuable for those who seek aid in making decisions.</i> <ol style="list-style-type: none"> 1. Local guidance staff 2. Local mental health clinics 3. Clergy 4. Community Health Council 5. Local physicians 6. Local schools (educational programs) 7. Rehabilitation facilities (halfway houses, out-patient clinics, community counseling centers) 	<ol style="list-style-type: none"> 1. Have a member of the school guidance staff discuss the role of the guidance office in helping students. 2. Explain to the students the make-up of the School-Community Health Council. Have a member of the Council come to class to discuss the work of the Council. 3. Have the school physician or school nurse discuss with the class the various medical consultants available locally. 4. Discuss the total Community-School Drug Education program. 5. Invite a physician to speak to the class regarding the doctor-patient relationship (treatment, confidence, legal responsibility). 6. Provide the students with an up-to-date list of drug rehabilitation agencies. 	<p><i>Book</i></p> <p>Byrd, Oliver, E., <i>et al. Health</i> (8)</p> <p><i>Pamphlets</i></p> <p>"Don't Guess About Drugs." National Clearing House for Mental Health Information.</p> <p>"Help a Narcotic Addict." Narcotic Addiction Control Commission, New York City.</p> <p>"Rehabilitation in Drug Addiction." Public Health Publication. United States Department of Health, Education and Welfare.</p>

Area II MENTAL AND SOCIAL HEALTH

Field of Study EMOTIONAL DEVELOPMENT (Junior High)

Objectives

To help the student to:

1. Understand the factors which contribute to the emotional make-up of each individual.
2. Establish proper attitudes toward the interaction between individuals.
3. Develop an awareness of the influence of existing socio-economic structures.
4. Understand the importance of the relationship between the environment and good mental health.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>The development of an individual's personality structure is influenced by his needs and environment.</i>	<ol style="list-style-type: none"> 1. Discuss methods of self-evaluation and establishing goals for oneself. 2. Discuss the differences in size and body proportions of boys and girls at the beginning and at the end of puberty. 	<p><i>Books</i></p> <p>Byler, Ruth, <i>et al. Teach Us What We Want to Know.</i></p>
<i>The development of the total personality is a continuing process.</i>	<ol style="list-style-type: none"> 3. Have the students make a list of all the emotions they are familiar with. Discuss different emotions as they relate to personality. 4. Discuss the fact that although emotions do not originate in any particular body system, they may affect all the body systems. 5. Arrange to have the school psychologist visit the class and discuss the relationships of the mind and body in maintaining good mental health. 6. Discuss the relationship between school grades and the individual's mental capabilities. 7. Have the students make a list of personality traits (reliability, loyalty, honesty, etc.) 8. Have each student write a brief paper on "Taking a close and honest look at myself." 9. Identify basic human needs and discuss the importance of satisfying these in personality development. 10. Have each student keep a record of any escape mechanisms he used for a two-week period. Discuss individual records. 11. Discuss how personality changes rather than remaining static. 12. Have the students identify physical factors around them which influence their behavior. 	<p>Clayton, Thomas E. <i>Teaching and Learning</i> (Part 3).</p> <p>Humphreyville, Frances. <i>The Years Between.</i></p> <p>Irwin, Leslie W., <i>et al. Concepts and Primary Concerns	Sample Learning Experiences	Resources
7. Environment	13. Discuss the importance of the social environment and its influence on personality development.	"Understanding Yourself." Science Research
a. Physical	14. Discuss some of the expectations of teen-agers and whether they are realistic.	Associates.
(1) Climate		
(2) Noise		
(3) Housing		
(4) Traffic		
(5) Colors		
(6) Pace of living		
(7) Crowded conditions		
b. Social	15. Have the students read <i>The Years Between</i> by Frances Humphreyville or <i>The Yearling</i> by Marjorie K. Rawlings, and report on how some of the characters in the books solved their problems.	
(1) Family		
(2) Friends		
(3) Community	16. Invite a clinical psychologist to discuss varying degrees of mental health.	
8. Identification and solution of individual problems	17. Discuss mental retardation.	
a. Recognizing the problem	18. Discuss the causes and cures of mental illness.	
b. Physical limitations		
c. Unsatisfied needs	19. Arrange for a psychiatrist and/or psychologist to discuss psychological services provided within the community and procedures for obtaining them.	
d. Unrealistic goals		
e. Conflicts		
(1) With self		
(2) With friends	20. Have some students identify organizations involved in the promotion of good mental health and discuss their services.	
(3) With adults		
9. Approaching a solution		
a. Talking about the problem		
(1) With parents		
(2) With other adults		
(3) With friends		
(4) With professionals		
10. Varying degrees of mental health		
a. Well adjusted		
b. Moderately disturbed		
c. Severely disturbed		
11. Availability and utilization of psychological services		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>As a member of society each individual must interact with others.</i>		
1. Inter-personal relationships a. Small groups (provide for closer association) b. Large groups (broaden the individual's perspective)	1. Discuss the importance of completing assigned tasks even when an individual does not especially like them. 2. Establish committees for small-group work and for large-group work.	<div>Books</div> Irwin, Leslie W., <i>et al. Patterns for Living</i> . Schneider, Robert E. <i>Health and Growth</i> . <div>Films</div> <i>Beginning to Date</i> . Encyclopaedia Britannica Educational Corp. <i>The Bully</i> . McGraw-Hill Book Company. <i>Dating Do's and Don'ts</i> . Coronet Films. <i>The Fun of Being Thoughtful</i> . Coronet Films. <i>Making Friends</i> . Encyclopaedia Britannica Educational Corp. <i>Parents Are People Too</i> . McGraw-Hill Book Company. <i>The Troublemaker</i> . McGraw-Hill Book Company. <i>What To Do on a Date</i> . Coronet Films.
2. Factors essential for team work a. Cooperation b. Compromise c. Enthusiasm d. Appreciating viewpoint of others	3. Have the class discuss factors which contribute to effective teamwork. 4. Have the students work on a specific project and evaluate student interaction at the completion of the project. 5. Arrange a panel discussion on the qualities which are necessary for friendship.	
3. Assessment of peer group	6. Discuss feelings that show that people often react in a similar fashion to similar situations.	
a. Values	7. Discuss reasons why friendships change.	
b. Goals	8. Have a committee write a script, dealing with dating etiquette. Have students act out the script.	
c. Influence	9. Have the students make a list of personal traits and characteristics which they most admire. Make a tabulation of the students' responses and use these for discussion.	
d. Acceptance and/or rejection	10. Have each student use the above list as a self-check.	
4. Boy-girl relationships	11. Discuss various ways in which individuals may contribute to good family relationships.	
a. Dating patterns	12. Discuss the "generation gap."	
b. Dating issues		<div>Filmstrips</div> <i>Using Your Time and Ability</i> . Jam-Handy Organization. <i>Your Feelings</i> . Jam-Handy Organization.
(1) Acceptance		
(2) Refusal		
(3) Dating activities		
5. Adolescent-parent relationships		
a. Growing with the family		
b. Discussing problems		
c. Listening to others		
d. Participating in family activities		
6. Influence of other groups.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
2. School a. Pressures b. Student-teacher-administration relationships c. Personal involvement 3. Community a. Relationships among community members. b. Consideration for others c. Respect for property	3. Discuss student-teacher relationships and ways in which both student and teacher can contribute to a desirable classroom atmosphere. 4. Discuss how one feels before an important examination and the possible effect of these feelings on performance. 5. Discuss methods of dealing with success and failure. 6. Define the term <i>clique</i> . Discuss the effect of school cliques upon the school environment. 7. Have the students plan wholesome recreational activities for young people in the community. 8. Plan a campaign to help project a desirable image of the teen-ager to people in the community. 9. Discuss the legal responsibilities of parents for the actions of a minor.	<i>Pamphlets</i> "Getting Along in School." Science Research Associates. "High School Ahead." Science Research Associates.

Area II MENTAL AND SOCIAL HEALTH

Field of Study TOBACCO (Junior High)

Objectives

To help the student to:

1. Develop an understanding of the reasons why people smoke.
2. Accept responsibility for his own behavior in regard to smoking.
3. Become acquainted with scientific facts about smoking.
4. Develop the ability to critically evaluate fact as opposed to fiction in advertising.
5. Recognize the economic and political influences on individual judgments in the use of cigarettes.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>There are many reasons why people choose to smoke or not to smoke.</i></p> <ol style="list-style-type: none"> 1. Social and psychological factors causing individuals to smoke <ol style="list-style-type: none"> a. Curiosity b. Peer approval c. Sociability d. Self-expression e. Identification <ol style="list-style-type: none"> (1) Adults (2) Movie stars f. Advertising 2. Reasons individuals continue to smoke <ol style="list-style-type: none"> a. Habit formation b. Psychological dependence 	<ol style="list-style-type: none"> 1. Have the class discuss and list on the chalkboard reasons <i>why</i> people smoke. Later they can group the reasons into categories (peer-group pressure, etc.) 2. Invite a behavioral psychologist to discuss "motivation" with the class. 3. Have students bring in advertisements directed toward specific groups (teen-agers, college students, etc.). Analyze the different advertising approaches to different groups. 4. Discuss the habits which people in other countries have which bear similarities to smoking (worry-beads, beetal nuts, etc.) 5. Compare and contrast cigarette smoking and the misuse of various drugs. 6. Have students list substitute actions for cigarette smoking. In what ways would each of the suggested substitutes be the same as, better than, or not as good as cigarette smoking? 	<p><i>Books</i></p> <p>Thackston, John A., and Newsom, William T. <i>Keeping Our Health</i> (8).</p> <p>Thackston, John A., Newsom, William T. <i>Protecting Our Health</i> (7).</p> <p><i>Film</i></p> <p><i>Smoking Past and Present.</i> Local Cancer Society.</p> <p><i>Filmstrip</i></p> <p><i>To Smoke or Not to Smoke.</i> Local Cancer Society.</p> <p><i>Idea Kit</i></p> <p><i>Idea Kit on Smoking and Health.</i> Massachusetts Interagency Council on Smoking and Health.</p> <p><i>Pamphlets</i></p> <p>"Me Quit Smoking? How?" Local Tuberculosis and Respiratory Disease Association.</p> <p>"Me Quit Smoking? Why?" Local Tuberculosis and Respiratory Disease Association.</p> <p>"Smoke Cigarettes? Why?" Do research on and discuss the social as well as economic impact of disability payments because of illness due to smoking. 3. Have the students report on the economic impact of the tobacco industry in southern states. 4. Investigate the possible impact on the cigarette industry and related industries if the manufacture of cigarettes is stopped. 	<p><i>Pamphlets</i></p> <p>"Annual Report on Tobacco Statistics." United States Government.</p> <p>"Smoking, Tobacco and Health." National Clearinghouse for Smoking and Health.</p>

Area III CONSUMER AND ENVIRONMENTAL HEALTH

Field of Study CONSUMER HEALTH (Junior High)

Objectives

To help the student to:

1. Become aware of the basic factors involved in consumer motivation.
2. Understand the background of health quackery.
3. Become aware of the practice of health quackery and to identify individuals practicing fraudulent techniques.
4. Know the factual data that will permit him to make wise choices and to use sound judgment in buying.
5. Be cognizant of the role of individuals, voluntary agencies, professional organizations, and government in consumer protection activities.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>The motives that guide health behavior play a significant part in consumer health.</i>		
<ol style="list-style-type: none"> Physical (improve appearance) Emotional <ol style="list-style-type: none"> Peer acceptance More mature Fear appeal Social <ol style="list-style-type: none"> More socially acceptable Fashionable 	<ol style="list-style-type: none"> Have the students discuss the reasons why people choose and buy various items. Have the students discuss situations in which fear of illness can result in harmful actions. Tell how these situations may be avoided. Have the class discuss the slogan "Let the buyer beware." Have a few students make a list of health-related products that teen-agers frequently buy. Have the class discuss these items as being typical of teen-age choices. 	<p>Article</p> <p>"AMA — FDA Rap Diet Pill Fad." <i>Today's Health</i>. April, 1968.</p> <p>Book</p> <p>Irwin, Leslie W., <i>et al. Patterns for Living</i>.</p> <p>Pamphlets</p> <p>"Cosmetics Facts for Consumers." Food and Drug Administration. United States Department of Health, Education and Welfare.</p> <p>"Did You Know That?" American Medical Association.</p>
<i>Teen-agers have become important purchasers in today's market.</i>		
<ol style="list-style-type: none"> Percentage of market controlled by teen-age buyers Influence of teen-age buying habits on adult buying 	<ol style="list-style-type: none"> Have the students estimate the purchasing power of teen-agers, and determine the extent of their spending on health-related products. Discuss industries existing primarily because of teen-age buyers (record and surfboard companies.). Have the students analyze how the teen-age dollar is spent. 	<p>Book</p> <p>Byrd, Oliver E., <i>et al. Health</i> (8).</p> <p>Guide</p> <p>"Consumer Report Buying Guide." Consumer Union Special Publications.</p> <p>Pamphlets</p> <p>"Prices." Food and Drug Administration.</p> <p>"Your Money and Your Life." Food and Drug Administration.</p>
<i>The producers of health products are constantly analyzing the purchasing habits of teen-age buyers.</i>		
<p>Teen-age purchases influenced by rational judgments, emotional reaction, packaging, seasons, style</p>	<ol style="list-style-type: none"> Discuss the effect of seasons on the buying habits of teen-agers. Have the students make a list of popular brands of goods. Discuss whether these goods are purchased because of rational judgment or emotional response. 	<p>Book</p> <p>Gentry, Curt. <i>The Vulnerable Americans</i>.</p> <p>Film</p> <p><i>Consumer Protection</i>. Coronet Films.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	<ol style="list-style-type: none"> 3. Have the students interview radio or television station personnel to discuss advertising techniques used in the communication media. 4. Have the students make health posters, using such ideas as testimonials, fear appeals, partial truths, out-of-context statements, promises of miracles. 5. Discuss the impact of television on the teen-age buyer. 6. Discuss a student's reaction to a given advertisement. Then discuss a parent's reaction. Are they similar or different? Why? 	
<p><i>Health quackery has a significant historical record in the development of medicine.</i></p> <ol style="list-style-type: none"> 1. Quacks and their motives 2. Use of nostrums, secret medicines, mechanical devices, etc. 	<ol style="list-style-type: none"> 1. Define the term <i>health quackery</i>. 2. Have the students do research on the history of ancient remedies before the 17th century. 3. Have a few students explore the growth of quackery in the United States. 4. Trace the history of any well-known non-prescription product. 5. Discuss methods by which quacks have capitalized upon religious beliefs and "miracles." 	<p><i>Article</i></p> <p>"Do-it-yourself Doctors of the Old West." <i>Today's Health</i>. October, 1965.</p> <p><i>Books</i></p> <p>Dunlop, Richard. <i>Doctors on the Frontier</i>.</p> <p>Gardiner, M. <i>Fads and Fallacies in the Name of Science</i>.</p> <p><i>Films</i></p> <p><i>Man Alive</i>. Frequent checking of equipment, tools, and apparatus essential 	<ol style="list-style-type: none"> 1. Invite a policeman, firefighter, or safety expert from an industrial plant to talk to the class on safety in his area. 2. Discuss how teen-agers can assist in making minor home repairs and improvements in order to prevent accidents. 3. Invite a home economics teacher to discuss safety problems in the kitchen. 	<p><i>Pamphlets</i></p> <p>“Bathroom Hazards.” National Safety Council.</p> <p>“Fire — What Would You Do?” National Fire Protection Association.</p> <p>“Hand Tools.” National Safety Council.</p> <p>“Lifting, Carrying, Lowering.” National Safety Council.</p> <p>“Non-Electric Household Equipment.” National Safety Council.</p> <p>“Safety in the Wood Shop.” National Safety Council.</p>

Development of self-reliance and self-discipline is necessary for reacting effectively in an emergency.

1. Knowledge of available help
2. Knowledge of when and where to call a physician or ambulance

1. Discuss reasons why people react differently under stress.
2. Discuss the importance of keeping away from the scene of an accident unless one can be of assistance.

Pamphlet

“Emergency 77.” Massachusetts Safety Council.

SENIOR HIGH

Area I PHYSICAL HEALTH

Field of Study NUTRITION

Objectives

To help the student to:

1. Become more knowledgeable about the interrelationship of nutrients.
2. Become aware that food influences all areas of the world.
3. Know that good nutrition may be achieved at low cost.
4. Understand the importance of the recent developments in food technology that should help to improve world food supply and distribution.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>Body efficiency is maintained and improved by proper food consumption.</i></p> <ol style="list-style-type: none"> Nutrients <ol style="list-style-type: none"> Broken down in the body Used in the synthesis of essential substances Metabolism (radical changes may hinder the absorption of nutrients in body) 	<ol style="list-style-type: none"> Have the students report on the function nutrients play in the body systems (enzymes, co-enzymes, hemoglobin, and hormones) Have a student report on phenylketonuria. 	<p><i>Film</i></p> <p><i>The Human Body: Nutrition and Metabolism.</i> New England Dairy and Food Council.</p> <p><i>Demonstration</i></p> <p><i>Animal Feeding Demonstrations.</i> New England Dairy and Food Council.</p> <p><i>Pamphlet</i></p> <p>"Choose Your Calories by the Company They Keep." New England Dairy and Food Council.</p> <p><i>Transparencies</i></p> <p><i>Nutrient Chart Transparencies.</i> New England Dairy and Food Council.</p>
<p><i>Lack of nutrients and/or calories retards growth and development.</i></p> <ol style="list-style-type: none"> Normal body processes disrupted by lack of nutrients Detrimental changes occur in body if deficiencies are prolonged 	<ol style="list-style-type: none"> Compare the life span and development of people in the United States today to those of people living during the time of the Pilgrims. Include population, death rate, birth rate, and types of diseases. Conduct animal experiments to show the effect of poor nutrition on growth and development. 	
<p><i>Nutrition quackery can be dangerous.</i></p> <ol style="list-style-type: none"> Vitamin pills <ol style="list-style-type: none"> Serve a limited purpose Not a cure—all for faulty nutrition Nutrients (no one food available containing each) Dietary inadequacies (may lead to physical and mental defects) 	<ol style="list-style-type: none"> Discuss reducing diets and what dangers are involved with fad diets. Make a poster of what is needed for a good reducing diet (three well-balanced meals, physical exercise, a good psychological attitude) Report on the terms <i>over-nutrition</i>, <i>malnutrition</i>, <i>kwashiorkor</i>. 	<p><i>Pamphlets</i></p> <p>"Defense Against Quackery." American Medical Association.</p> <p>"Weight Control Source Book." New England Dairy and Food Council.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>All human beings need the same nutrients but in different amounts, according to age, sex, size, activity and health.</i></p> <ol style="list-style-type: none"> 1. Adequate diet essential during final teen-age growth years. 2. Nutrition and weight control essential during pregnancy <p><i>The United States government is trying to improve the nutritional status of its people.</i></p> <ol style="list-style-type: none"> 1. Eating habits of Americans <ol style="list-style-type: none"> a. Considered to be poor b. Diets lack basic needs 2. Education of citizens <ol style="list-style-type: none"> a. Critical need b. Many organizations involved, including federal government 	<ol style="list-style-type: none"> 1. Have the students discuss the final growth processes and the role nutrients play. 2. Have the students report on the effects of inadequate diet on the mother and fetus during pregnancy, on the new-born, and on the developing infant. <ol style="list-style-type: none"> 1. Discuss the problems of obesity and underweight, and identify contributing factors. 2. Have leaders of organizations report on programs attempting to improve the nutritional status of Americans (Headstart, school lunch and breakfast programs, commodity food distribution). 	<p><i>Pamphlets</i></p> <p>"What to Eat Before You Are Pregnant/While You Are Pregnant/After the Baby Comes." New England Dairy and Food Council.</p> <p><i>Pamphlet</i></p> <p>"Weight Control Source Book." New England Dairy and Food Council.</p>
<p><i>In developing countries, poor nutrition is one of the major reasons for slow progress.</i></p> <ol style="list-style-type: none"> 1. Nutritional status of people depends upon availability, quantity, and variety of foods 2. Progress of a country depends upon healthy man-power. <p><i>Many factors govern the way people eat.</i></p> <ol style="list-style-type: none"> 1. Supply and demand determine eating habits 2. Physical, emotional, and environmental factors influence nutrition at all stages of development. 	<ol style="list-style-type: none"> 1. Have the students make graphs showing population and food production in developing countries of the world and compare these to the United States. 2. Discuss the nutritional diseases prevalent in developing countries and suggest ways they may be reduced. <ol style="list-style-type: none"> 1. List factors which influence the price of a food item (transportation, seasonability, processing, packaging). 2. Discuss how food intake depends upon eating patterns, customs, environment, and knowledge. 3. Report on dietary restrictions of different 	<p><i>Book</i></p> <p>Lowenberg, Miriam E., et al. <i>Food for Man.</i></p> <p><i>Film</i></p> <p><i>Food for Life.</i> New England Dairy and Food Council.</p> <p><i>Books</i></p> <p>American Home Economics Association. <i>Family Holidays Around the World.</i></p> <p>United States Department of Agriculture. <i>The Yearbook of Agriculture: Food for All of Us, 1969.</i> Consumers All, 1965. Food, 1959.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
3. Level of nutrition correlates with education	ethnic and religious groups. 4. In cooperation with the Home Economics Department plan a holiday food-tasting party.	
<i>The wise consumer is a discriminating shopper.</i>	1. Have the students make a calendar of foods in season for each month. 2. Have the students compare a convenience product such as a TV dinner with a similar meal prepared at home. 3. Have the students survey markets of various sizes and location and prepare a price list of similar staple items. 4. Have the students list protein foods which are less expensive than meat.	<i>Film</i> <i>More Food for Your Money.</i> New England Dairy and Food Council. <i>Pamphlet</i> "Food Consumption of Households in the United States." United States Department of Agriculture.
<i>The food industry which is the largest industry in the world is important to the world's economy.</i> <i>New foods are being produced to meet the world's growing population.</i>	1. Have the students do research on programs which are trying to improve world nutrition (WHO, UNICEF, FAO). 2. Have the students report on high protein foods (fish protein concentrate and soy bean products). 3. Have the students list the kinds of foods exported and imported by the major countries of the world. 4. Have the students list the industries which contribute to the food industry.	<i>Film</i> <i>Food for a Modern World.</i> Henk, Newenhouse. <i>Pamphlet</i> "Food Science and How It Began." New England Dairy and Food Council.
<i>Regulations on the federal, state, and local levels govern food production and processing.</i>	1. Invite state, federal, and/or local inspectors to discuss food protection procedures. 2. Plan a tour of a food processing plant to see how food is processed and what sanitation methods are being used. Have the students constructively criticize their observations.	<i>Film</i> <i>Meat on the Move.</i> Swift and Company.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
-------------------------------	-----------------------------	-----------

	3. Using current news items, have the students investigate the use of pesticides. 4. List food additives and their purposes.	
--	---	--

Area II MENTAL AND SOCIAL HEALTH

Field of Study ALCOHOL (Senior High)

Objectives

To help the student to:

1. Understand the history of alcohol and its many uses.
2. Understand the scope of the problem of excessive drinking.
3. Recognize that there are responsibilities associated with the decision to use alcohol.
4. Recognize and evaluate the influence of the advertising media on the young buyer and his attitudes regarding the use of alcoholic beverages.
5. Understand alcoholism in today's society.
6. Develop an awareness of the preventive and corrective measures of coping with alcoholism.

ALCOHOL (Senior High)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Alcohol has been used in a variety of ways throughout the ages.</i>		
1. Alcohol and drinking patterns.	1. Have the students do research on the history of the social usage of alcohol.	<i>Books</i> Carroll, Charles R. <i>Alcohol: Use, Nonuse and Abuse.</i>
2. Biological and psychological implications and moral issues	2. Study the history of Prohibition and evaluate the reasons for the repeal of the 18th Amendment.	Lolli, Giorgio. <i>Social Drinking.</i>
3. Alcohol and community health	3. In a class discussion, evaluate the social acceptance of alcoholic beverages.	McCarthy, Raymond G. <i>Facts About Alcohol.</i>
	4. Have the students do research to discover the relationship between the use of alcoholic beverages and public health problems	<i>Film</i> <i>To Your Health.</i> Center for Massachusetts Communications.
	5. Provide the students with a list of personal psychological needs and discuss how they relate to the individual's decision to drink alcoholic beverages.	<i>Pamphlet</i> "Thinking About Drinking." Massachusetts Department of Public Health
<i>When alcohol is misused, many problems may develop.</i>		
1. Increasing percentage of Americans using alcohol	1. Study the current problem of the consumption of alcoholic beverages at the state level.	<i>Books</i> Bogue, Donald. <i>Skid Row in American Cities.</i>
2. Problem drinkers	2. Discuss the trends of usage according to sex.	McCarthy, Raymond, <i>Alcohol Education for Classroom and Community.</i>
a. Increase in numbers	3. Discuss the increase in the consumption of alcoholic beverages since the turn of the century.	Shevlin, Julius B., and Goldberg, Isidor H. <i>Facts About Alcohol: A Programmed Unit.</i>
b. Geographical distribution	4. After doing research, have the students discuss the statement "At least one student in every classroom is a potential alcoholic."	<i>Pamphlet</i> "Alcoholism in Massachusetts." Division of Alcoholism, Massachusetts Dept. of Public Health.
c. Ethnic groups	5. Have the students obtain facts relating home accidents to excessive drinking.	<i>Pamphlets</i> "Alcoholism: A Family Guide to Understanding the Illness and What to Do About It." Massachusetts Department of Public Health.
3. Trends in alcoholism rates	6. Have a few students obtain facts relating to the alcohol user and the alcoholic and the problems facing them when purchasing life insurance.	"Hangover Losses." National Council on
a. Current research	7. Invite a representative from the safety division of a local industrial firm to speak on industrial problems created by excessive drinking.	
b. Treatment rate increasing with new procedures.		
4. Alcoholism and home accidents		
5. Excessive drinking and highway safety		
6. Excessive drinking and industry		
a. Lost man-hours		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
b. Cost factor to industry 7. Crime and alcohol relationship 8. Alcoholism and deaths (life expectancy decreased) 9. Alcoholic parent <ol style="list-style-type: none"> Cost in human suffering Disruption of family unit 10. Public welfare (problem drinker may become dependent upon society)	8. Invite a Juvenile Officer from the local Police Department to speak about "Youth, Crime, and Alcohol." 9. Have a group of students visit a session of the Juvenile Court and observe the number of cases which involve the use of alcohol. Prepare a report to present to the class for discussion. 10. Have the students write reports, comparing local and national death rates due to alcoholism. 11. Have the students discuss the problems of the alcoholic parent and the child in the home. 12. Have several students interview a lawyer or judge to find out how the misuse of alcohol contributes to divorce, broken homes, and problem children. Discuss the social implications. 13. Obtain facts from the Department of Public Health, Division of Alcoholism on the relationship between alcoholism and the welfare status of individuals.	Alcoholism, Inc. "Health Education Through a Council on Alcoholism." National Council on Alcoholism, Inc. "The Hospital's Place in a Program of Alcoholism." of Alcoholism." National Council on Alcoholism, Inc. "Recent Findings Regarding Alcoholism in Industry." National Council on Alcoholism, Inc. "The Social Agencies' Responsibility in the Alcoholism Program." National Council on Alcoholism, Inc.
<i>The decision to drink, whether excessively or moderately, is an individual responsibility.</i> 1. Responsibility of the teen-ager <ol style="list-style-type: none"> To himself To peers To Family 2. Responsibility of the parent <ol style="list-style-type: none"> Setting an example Helping with decisions Family finances affect decision making 3. Responsibility of host or hostess (respecting decisions of others to drink or abstain)	1. Have the students debate the question of whether or not teen-agers should be permitted to drink in the home. 2. Discuss the individual's privilege to refuse a drink without feeling alienated from others. 3. Discuss the topic "Problem drinking and family membership appear to be incompatible." 4. List and discuss problems affecting a family if one member drinks heavily. 5. Discuss the problems encountered within the family when more of the family budget is spent on the purchase of alcoholic beverages	<i>Books</i> Al-Anon Family Group Headquarters. <i>Living with an Alcoholic.</i> Cain, Arthur. <i>Young People and Drinking.</i> Life, John R. <i>Concepts in Health, Course Four.</i> Pittman, David, and Snyder, Charles R. <i>Society, Culture and Drinking Patterns.</i> <i>Films</i> I <i>Never Looked at It that Way Before.</i> Massachusetts Medical Society.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
4. Responsibility as operator of a vehicle (traffic fatalities and offenses directly related to use of alcohol) 5. Sound decision-making vital	rather than basic needs. 6. Have the students role play the planning of a party wherein some friends elect to drink alcoholic beverages and some friends abstain. 7. Show and discuss the film <i>I Never Looked at It that Way Before</i> .	<i>Understanding Stresses and Strains</i> . Walt Disney Productions.
<i>Advertising greatly influences the young buyer in today's society.</i> 1. Television 2. Radio 3. Newspaper 4. Magazines 5. Other media	1. Have the students survey and evaluate techniques used by advertisers in influencing people to drink. 2. Plan a class project to take pictures of local liquor advertisements. Discuss the techniques used by the advertisers. 3. Have some students do research on the amount of money spent on advertising alcoholic beverages. Compare this expenditure to expenditures for some of the necessities of life. 4. Have a committee of students collect clippings and advertisements from newspapers and magazines which relate to the use of alcohol. Make a bulletin-board display of the materials.	
<i>Alcoholism is now recognized as a disease, and rehabilitation of the alcoholic involves many people.</i> <i>Physiological, psychological, and sociological factors surround the disease.</i> 1. Warning signs a. Drinking to face up to situations b. Solitary drinking c. Early morning drinking d. Individual variations 2. Treatment of alcoholism	1. Have the students discuss the question "Are alcoholics born or are they made by the environment?" 2. Classify each of the various symptoms of alcoholism into physiological, psychological, or sociological categories. Discuss the interrelationships. 3. Have two students visit an alcohol rehabilitation center and report their findings to the class. 4. Have the students investigate what is being	<i>Books</i> Chafetz, Morris E., and Demone, Harold W., Jr. <i>Alcoholism and Society</i> . Jellinek, E.M. <i>The Disease Concept of Alcoholism</i> . Keller, Mark and McCormick, Mairi. <i>A Dictionary of Words About Alcohol</i> . Ullman, Albert. <i>To Know the Difference</i> . Williams, Lincoln. <i>Tomorrow Will Be Sober</i> .

Concepts and Primary Concerns	Sample Learning Experiences	Resources

Have some interested students report to the class findings of some current laboratory and clinical research on alcoholism. As a class project, make posters depicting cautions, dangers, and preventive aspects of the alcohol problem. 	<p><i>Book</i></p> <p>Pittman, David, and Snyder, Charles. <i>Society, Culture and Drinking Patterns.</i></p> <p><i>Pamphlets</i></p> <p>“Alcohol and Alcoholism.” United States Department of Health, Education and Welfare.</p> <p>“Alcoholism in Massachusetts.” Massachusetts Department of Public Health.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	5. Discuss and list examples of felonies, misdemeanors, and minor offenses, resulting from excessive use of alcohol.	"Questions and Answers about Chemical Testing of Intoxicated Drivers." Massachusetts Department of Public Health, Division of Alcoholism.
6. Discuss local liquor control laws.	7. Have the students obtain for class discussion the local regulations on alcohol and alcohol-related problems.	
8. Study the state laws pertaining to drinking and driving and discuss how they might be improved to be more effective.		"The New Law on Drinking and Driving." Massachusetts Registry of Motor Vehicles. <i>Transparencies</i>
9. Have a debate on the question of lowering the legal age in Massachusetts for drinking alcoholic beverages.		
10. Arrange for students to observe a court case dealing with an alcohol-related offense.		<i>Alcohol Level III</i> . D.C.A. Educational Products, Inc.
11. Have a police officer or lawyer visit and discuss the "implied consent" law with the students.		
12. Have the students write their impressions of a story concerned with the alcoholic and his problems. Some examples of stories are:	(1) <i>No Hiding Place</i> , by Beth Day. (2) <i>Come Back Little Sheba</i> , by William Inge. (3) <i>The Lost Weekend</i> , by Charles Jackson.	

Area II MENTAL AND SOCIAL HEALTH

Field of Study DRUGS (Senior High)

Objectives

To help the student to:

1. Become aware of the total drug problem in today's world.
2. Understand the nature of various drugs and their effects upon the body.
3. Become acquainted with the scope of society's attempt to place drug use in its proper perspective.
4. Develop an understanding of the drug user along with the individual's and community's responsibility in seeking solutions to the drug problem.

DRUGS (Senior High)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Drug use has become a major problem in today's society.</i>		
<ol style="list-style-type: none"> Contribution of modern drugs <ol style="list-style-type: none"> Prevent and control disease Control inflammatory reactions Relieve pain Modify moods Control allergic reactions Prescription drugs <ol style="list-style-type: none"> Dunham-Humphrey Amendment (Foods, Drug and Cosmetic Act) Drug Abuse Control Amendments Physician's responsibility Individual's responsibility Non-prescription drugs <ol style="list-style-type: none"> Warning on labels Deleterious effects Indiscriminate use of aspirin Self-medication Effects of combining drugs (synergistic effects) 	<ol style="list-style-type: none"> Provide a question box so that students may submit questions they may not wish to ask during class time. Have individual students obtain free materials on drugs from local, state, and federal organizations. Have the students seek information from the local or Massachusetts Medical Society as to the beneficial uses of drugs. Invite the school medical advisor to discuss the importance of drugs in today's world. Show the students "facsimile drugs" so that they will know the characteristic shape, color, and size of the various drugs. Have the students discuss the individual's responsibility in self-medication. Invite the local pharmacist to discuss the extent of the use of non-prescription drugs by the members of the community. Have the students analyze the various warning labels on drug containers. Discuss the difference between occasional use of drugs and self-medication. Discuss the potential hazards involved in exchanging prescription medicines. 	<p><i>Books</i></p> <p>American Medical Association. <i>Drug Dependence - A Guide for Physicians.</i></p> <p>American School Health Association. <i>Teaching About Drugs.</i></p> <p>Kaplan, Robert. <i>Drug Abuse - Perspective on Drugs.</i></p> <p><i>Filmstrip</i></p> <p>RX - <i>Not for Kicks.</i> Society For Visual Education.</p> <p><i>Pamphlets</i></p> <p>"A Doctor Discusses Narcotics and Drug Addiction." <i>Maintenance of good health is obtained through a balance of physical, intellectual, emotional, and social developments.</i>		
	<ol style="list-style-type: none"> 1. Discuss the importance of parents and other adults setting examples for children. Establish a committee of students, administrators, faculty members, parents, and community members to evaluate and assist in solving the local drug problem (community Health Council). 2. Discuss how society can cope with the pressures of day-to-day living without using drugs as a crutch. 3. Assign interested students to write an article for the local paper on contributions made by individuals in drug abuse prevention. 4. Discuss how an imbalance of physical, intellectual, emotional and social development may create personal health problems. 	<p>"Suggested Approaches in Drug Education." Massachusetts Department of Education.</p>

Area II MENTAL AND SOCIAL HEALTH

Field of Study EMOTIONAL DEVELOPMENT (Senior High)

Objectives

To help the student to:

1. Obtain a better understanding and acceptance of himself.
2. Further develop his ability to control his reactions to life situations.
3. Appreciate his role and the role of society in providing a desirable environment for maintaining good mental health.

EMOTIONAL DEVELOPMENT (Senior High)

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Good mental health helps maintain one's physical health and social effectiveness.</i>		
1. The central nervous system a. Center of organic functions b. Bodily processes influenced (1) Digestion (2) Skin reactions (3) Heart action	1. Have the students discuss the meaning of mental health. 2. Have a group of students do research on the interrelatedness of good physical and good mental health.	<p><i>Books</i></p> <p>Barton, Helen B. <i>Nervous Tension, Behavior and Body Functions.</i></p> <p>Crawford, John E. <i>Better Ways of Growing Up.</i></p> <p>Diehl, Harold S., et al. <i>Health and Safety for You.</i></p> <p>Groch, Judith. <i>You and Your Brain.</i></p> <p>Kahn, Fritz. <i>The Human Body.</i></p> <p>Morgan, Clifford T. <i>Introduction to Psychology.</i></p> <p>Nourse, Alan E. <i>The Body.</i></p> <p>Reik, Theodor. <i>Curiosities of the Self.</i></p> <p>Roam, Pearl. <i>A Book About You.</i></p> <p>Strecker, Edward A. and Appel, Kenneth. <i>Discovering Ourselves.</i></p> <p>Van Dyke, Vonda Kay. <i>That Girl in Your Mirror.</i></p>
2. The endocrine system a. Effects on emotions b. Anxieties can hinder normal body functions c. Possible effects on digestion and skin	3. Have each student write a brief paper on physical activity as an emotional safety valve. 4. Discuss the fact that it is normal for everyone to experience poor mental health at some time. Have the students give examples. 5. Discuss the difference between an organic and a functional disease.	
3. Good physical health (contributes to good mental health)	6. Discuss the relationships between emotions and underweight and overweight.	
4. Desirable personality characteristics (based on a feeling of well-being)	7. Have the students find news articles which describe super-human feats performed by an individual during an emotional crisis.	
5. Personality development (follows fairly consistent patterns)	8. Invite a psychiatrist to class to discuss the interrelationship of the nervous system, the endocrine system, emotions, and body functions.	
6. Patterns (reflect the interplay of positive and negative emotions)	9. Have the students discuss the proverb "As the twig is bent, so the tree inclines."	
7. Physical characteristics	10. Discuss the relationship of physical characteristics to personality development.	
8. Behavioral characteristics		
9. Character traits		
10. Motivation and drive (add to intellectual efficiency)		
11. Social functioning		
12. Social forces (affect an individual's mental health)		

Emotions are the motivators in human behavior.

1. Discuss various emotions and have the students

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<ol style="list-style-type: none"> 1. Stages of development 2. Identification 3. Development and control <ol style="list-style-type: none"> a. Serve a useful purpose b. May be detrimental 	<ol style="list-style-type: none"> 1. identify with experiences which involved specific emotions. 2. Have the students discuss the characteristics of the emotionally mature person and the characteristics of the emotionally immature person. 3. Have the students observe friends and relatives and note those who meet emotional stress with calm and controlled behavior. 4. Discuss how anxiety can sometimes be used to serve a useful purpose. 5. Have each student keep a diary for a week, noting the times that he displays a lack of emotional control. The diary can serve as a basis for self-evaluation. 	<p><i>Books</i></p> <p>Bonney, Merl E. <i>Mental Health in Education</i>. Coleman, James C. <i>Abnormal Psychology and Modern Life</i>. Invite a member of the guidance department to tell the class where individuals with mental health problems may seek assistance. 4. Have a committee seek information about the various agencies in the community which can assist individuals with emotional problems. 5. Have the students seek information on recent laws and regulations concerning mental health.	

Area II MENTAL AND SOCIAL HEALTH

Field of Study TOBACCO (Senior High)

Objectives

To help the student to:

1. Become familiar with scientific information concerning smoking and its effect upon the individual.
2. Understand the variety of reasons why people smoke.
3. Evaluate the effect of advertising and other pressures.
4. Accept the responsibility for improving and safeguarding his health and environment.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>There is sufficient evidence today to substantiate a definite relationship between smoking and health.</i>		
1. Animal experiments 2. Clinical and autopsy studies 3. Population studies	1. Obtain copies of the Surgeon General's Report and assign sections to groups for class reports.	<i>Book</i> United States Department of Health Education and Welfare. <i>Smoking and Health</i> . <i>Pamphlets</i> "Breathing — What You Need To Know." Local Tuberculosis and Respiratory Disease Association. "Smoking, Health and You." Public Health Service. United States Department of Health, Education and Welfare.
<i>Smoking may interfere with the normal functioning of the bodily processes, presenting a danger to physical health.</i>		
1. Digestive system 2. Taste and digestion 3. Chronic digestive disturbances <ol style="list-style-type: none"> Peptic ulcer Duodenal ulcer Cancer of the mouth, stomach, esophagus, etc. 4. Nervous system <ol style="list-style-type: none"> Stimulation Depression 5. Respiratory system (effect on mucous membranes) 6. Emphysema and bronchitis 7. Circulatory system <ol style="list-style-type: none"> Increase in heart rate and blood pressure 	1. Organize the students into committees. Provide each committee with resource material on smoking and health. Have each committee do research on the effects of smoking on various organs of the body. 2. Show the film <i>Tobacco and the Human Body</i> . Discuss the effect of tobacco on the various organs of the body. 3. Discuss the fact that cigarette smokers experience ulcers more frequently than non-smokers. 4. Show the film <i>Smoking and You</i> . Discuss the effects of smoking on the lungs and its relationship to chronic bronchitis and heart disease. 5. The effects of smoking on blood circulation can be tested with a clinical thermometer. Have a non-smoker or someone who has not smoked for several hours hold the thermometer. Then have a smoker hold the thermometer. Smokers show a drop of 6° or more (even with filter	<i>Books</i> Brownell, Clifford L. <i>et al. High School Health Science</i> . Byrd, Oliver E., <i>et al. Health Today and Tomorrow</i> . Area III CONSUMER AND ENVIRONMENTAL HEALTH

Field of Study CONSUMER HEALTH (Senior High)

Objectives

To help the student to:

1. Discriminate between reliable and unreliable health information.
2. Become concerned about the health protection of his family and others.
3. Become aware of specialists and other individuals and organizations providing assistance in medical care.
4. Become cognizant of major trends in medical care practices and medical care plans.
5. Develop an increasing awareness of consumer protection through legislation, investigation and education.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>The young adult is continuously influenced by various forces attempting to reach the health consumer.</i></p> <ol style="list-style-type: none"> 1. Reliable sources (view source critically) <ol style="list-style-type: none"> a. Medical health organizations b. Voluntary health organizations c. Scientific societies d. Physicians e. Pharmacists 2. Unreliable sources <ol style="list-style-type: none"> a. News articles (unless documented) b. Superstitions c. Customs d. Quacks 	<ol style="list-style-type: none"> 1. Plan a discussion on the reliable and unreliable sources of health information. 2. Compare a professional and non-professional magazine and note the number and types of health-related aids. 3. Conduct an anthropology-based study of various health-related superstitions and customs. Discuss ways in which these superstitions have contributed to or hindered medical advancement. 	<p><i>Article</i></p> <p>"Don't Get Hooked by the Mail Frauds." <i>Changing Times</i>. July, 1963.</p> <p><i>Books</i></p> <p>Carson, G. <i>One for a Man, Two for a Horse</i>. Kieus, A. <i>Magic, Faith and Healing</i>. Lynd, Albert. <i>Quackery in the Public Schools</i>.</p> <p><i>Film</i></p> <p><i>Wise Buying</i>. Coronet Films.</p>
<p><i>Evaluation of the reliability and usefulness of health information is possible when the buyer utilizes established criteria.</i></p> <ol style="list-style-type: none"> 1. Source of information 2. Professional background of the individual 3. Reputation of the individual or organization 4. Motive behind the product 5. Scientific presentation of the information 	<ol style="list-style-type: none"> 1. Have the students bring in ads from newspapers and magazines and evaluate the products, using the suggested criteria. (See Concepts.) 2. Prepare a list of 5-10 books or magazines related to health, health products, and information. Have the class do research on the credentials of the authors and the publishers. 	<p><i>Article</i></p> <p>"The Medicine Show." <i>Consumer Reports</i>.</p> <p><i>Book</i></p> <p>Johns, E., et al. <i>Health for Effective Living</i>.</p> <p><i>Transparencies</i></p> <p><i>Analyzing Influences on Health Choices</i>. 3M Company</p>
<p><i>Advertising through various media has a strong influence on the young adult as a consumer of health products and services.</i></p> <ol style="list-style-type: none"> 1. Selling techniques <ol style="list-style-type: none"> a. Low pressure method (buyer makes his own decision) b. High pressure method (forceful, aggressive tactics) 	<ol style="list-style-type: none"> 1. Have the students identify various exercise or weight-reducing programs. If possible, investigate the professional background of the individual sponsoring the program or interview a qualified physician as to the medical feasibility of the program. 2. Have the students role play situations which 	<p><i>Books</i></p> <p>Bauer, W.W. <i>Today's Health Guide</i>. Masters, Dexter. <i>Intelligent Buyer and the Telltale Seller</i>. Area IV SAFE LIVING

Field of Study SAFETY (Senior High)

Objectives

To help the student to:

1. Recognize that accidents are the result of underlying causes, some of which may be psychological.
2. Become alert to situations which contribute to an unsafe environment.
3. Develop an appreciation of the strong impact safe living has upon the national economy.
4. Appreciate that adjusting and adapting to one's environment results in safer living.

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<i>Accidents tend to follow predictable and modifiable patterns.</i>		
<ol style="list-style-type: none"> 1. Identification of causes 2. Study of interrelationships between person or persons involved, the agent, and the environment 3. Classification of accidents 4. Identification of segments of population 5. New findings from analytical studies 	<ol style="list-style-type: none"> 1. Have the students report on an accident which happened in the community. They should consider the place, setting, equipment, reaction, etc. 2. Seek information from the Massachusetts Safety Council on safety studies recently completed. Discuss the findings and how these studies were conducted. 	<p><i>Books</i></p> <p>Meredith, Florence, et al. <i>Health and Fitness</i>. Stack, Herbert, and Elkow J. Duke. <i>Education for Safe Living</i>.</p> <p><i>Film</i></p> <p><i>Anatomy of an Accident</i>. Distributed by local police department.</p> <p><i>Pamphlets</i></p> <p>"Using Standard Accident Reports."</p> <p>Massachusetts Safety Council.</p> <p>"What You Should Know About Standard Student Accident Reports." Massachusetts Safety Council.</p>
<i>Underlying causes can set the stage for accidents.</i>		
<ol style="list-style-type: none"> 1. Emotions <ol style="list-style-type: none"> a. Fear b. Anger c. Hatred d. Anxiety e. Nervousness 2. Lack of emotional stability 3. Attention seekers 4. Behavior patterns <ol style="list-style-type: none"> a. Lack of concentration b. Accident proneness c. Perception (awareness of objects in one's environment) d. Reaction time 5. Attitudes 	<ol style="list-style-type: none"> 1. Have the students make a study of a variety of accidents reported locally. Have a discussion of the possible underlying causes of such accidents. 2. Have the students work in committees to do research on the importance of determining underlying causes of accidents, which underlying causes are most common, and how they may be eliminated. 3. Plan for a panel discussion, using the topic "The relationship of personality to accidents." 4. Find out how observant the students are of their environment by asking them a number of questions about a room they go into often. 	<p><i>Films</i></p> <p><i>Everybody's Different</i>. Massachusetts Safety Council.</p> <p><i>People Are All Alike</i>. Massachusetts Safety Council.</p> <p><i>Safety Attitudes</i>. Massachusetts Safety Council.</p> <p><i>Teamwork for Safety</i>. Massachusetts Safety Council.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
a. Development of desirable attitudes b. Poor attitudes difficult to change		
<i>Human factors can be modified to prevent accidents.</i>	1. List several poor attitudes which could contribute to accidents. Discuss how and when these attitudes are usually formed and suggest ways in which they can be changed.	<i>Pamphlets</i> "Accidents Facts - 1970." National Safety Council.
1. Accident repeaters can become careful 2. Irresponsible individuals should acquire responsible attitudes	2. Have the students discuss age as a factor in accident rates.	"National Standard School Shop Safety Inspection Checklist." Massachusetts Safety Council.
3. Reduction in abuse of drugs and alcohol	3. Develop a list of characteristics as they relate to the accident prone person and compare these characteristics to those of the safety conscious individual.	"Safety in the Auto Shop." Massachusetts Safety Council.
<i>Accidents are sometimes the result of inability to perform certain skills.</i>	4. Discuss briefly accidents in which alcohol or drugs may have been contributing factors.	"Safety in the Electrical Shop." Massachusetts Safety Council.
1. Skillful performance essential	5. Have a few students investigate hazards involved in performing recreational skills such as using firearms, surfing, taking part in competitive sports.	"Safety in the Gymnasium." Massachusetts Safety Council.
a. Driving		"Safety in the Machine Shop." Massachusetts Safety Council.
b. Motor cycling		"Track and Field Events." Massachusetts Safety Council.
c. Competitive sports		
d. Industrial arts		
e. Hunting		
2. Fatigue factor critical for favorable reaction time		
<i>Parental responsibility includes protection of children and providing a safe environment.</i>	1. Have members of the class make a survey of hazards in the neighborhood which could hurt children. If possible, develop a project to eliminate such hazards.	<i>Book</i> Brownell, Clifford L., and Evans, Ruth. <i>Health Science</i> .
1. Identification of childhood accidents	2. Have the students develop a safety list for the home and use the list to evaluate their own homes. Compile statistics from the data when it is returned.	<i>Pamphlets</i> "Bathroom Hazards." Massachusetts Safety Council.
a. Motor vehicles		"Electrical Equipment." Massachusetts Safety Council.
b. Fires		"Hand Tools." Massachusetts Safety Council.
c. Drowning		"The Hazard Hunter." Massachusetts Safety Council.
d. Poisons		
2. Safety-consciousness	3. Have a debate on the topic "The safest place is home."	
3. Balance between common sense and over cautiousness	4. Have each student plan a schedule which will allow enough time in the morning for the	
4. Prevention of home accidents (family cooperation)		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
	members of the family to get to school or work safely and on time. Follow the plan for a week and discuss in class the necessity for total family cooperation.	"Kids Will Be Kids." Massachusetts Safety Council.
	5. Have each student make a list of common household items and tell where he believes he will find each one in his home. Have the student check at home to see how many items were in their correct places.	"Motorcycling and You." Channing L. Bete Company.
	6. Discuss the statement "Home accidents occur five times as frequently as motor vehicle accidents."	"Play Areas." Massachusetts Safety Council. "Playground Surfacing." Massachusetts Safety Council. "Unauthorized Play Spaces." Massachusetts Safety Council.
		<i>Periodical</i> <i>Family Safety.</i> National Safety Council.
<i>Each individual must assume a greater responsibility for his safety and the safety of others.</i>	1. Discuss accidents which can occur as a result of practical jokes.	<i>Kits</i> <i>Babysitter Safety Program Kit.</i> National Safety Council.
1. Establish a degree of orderliness	2. Have the students discuss the relationship between self discipline and accident prevention.	<i>Safety of the Elderly Program Kit.</i> National Safety Council.
2. Eliminate harmful practical jokes	3. Have the students discuss their experiences while babysitting and how they handled any emergencies.	<i>Pamphlets</i> "Councilors and Helpers in Summer Camps." Massachusetts Safety Council.
3. Eliminate commonly identified hazards	4. Have the students role play a situation, showing the responsibility of the babysitter in an emergency situation.	"Forget Things." Massachusetts Safety Council. "Poor Sight." Massachusetts Safety Council. "Tire Easily." Massachusetts Safety Council. "You're in Charge." Massachusetts Safety Council.
a. Items on the stairs	5. Have students who babysit construct a notebook and include important information such as emergency telephone numbers, tips on how to handle children at various age levels, activities to provide safe entertainment for the children, preparation of food and feeding of children, anticipating emergencies.	
b. Blocked doorways	6. Invite members of the Golden Age Club to visit the class. The students can discuss with them how to avoid accidents.	
4. Repair faulty equipment		
5. Use potentially hazardous items carefully		
a. Sharp knives		
b. Power tools		
6. Practice preventive measures		
a. Working as a babysitter		
b. Working as a playground instructor		
c. Working at a summer camp		
d. Assisting the aged		

Concepts and Primary Concerns	Sample Learning Experiences	Resources
<p><i>A safe environment requires constant alertness to unsafe situations.</i></p> <ol style="list-style-type: none"> 1. Attention requires concentration (reaction time and perception develop as attention improves) 2. Undesirable habits and attitudes can be changed by <ol style="list-style-type: none"> a. Modifying habits b. Practicing safe habits 	<ol style="list-style-type: none"> 1. Have the students do research on some critical safety areas which require alertness (snowmobile as a family vehicle, firearms, power tools.) 2. Discuss the responsibilities involved in owning a motor cycle, motor scooter, or motorized bicycle. 3. Establish committees to make safety inspections of the school and specific areas of the community. 4. Have students discuss their own undesirable safety habits and make suggestions on how these habits can be changed. 	<p><i>Article</i></p> <p>"The Alluring but Alarming Snowmobile." <i>Family Safety</i>. Winter, 1969.</p> <p><i>Book</i></p> <p>Lawrence T. Gordon, <i>et al. Your Health and Safety</i>.</p> <p><i>Pamphlet</i></p> <p>"Are You Safety Conscious?" Massachusetts Safety Council.</p>
<p><i>Human resources, time, and money are lost through accidents.</i></p> <ol style="list-style-type: none"> 1. Accident problem <ol style="list-style-type: none"> a. Leading cause of death in the first half of life span b. Human resources <ol style="list-style-type: none"> (1) Disabling injuries (2) Deaths (motors vehicles, work, home, drownings) c. Occupational concerns <ol style="list-style-type: none"> a. Industry spends considerable sums <ol style="list-style-type: none"> (1) Providing safety measures for employees (2) Providing safety programs 	<ol style="list-style-type: none"> 1. Have a few students contact a legal insurance company for data on current accident statistics and report their findings to the class. 2. Have a few students write a report using data from the pamphlet "Accident Facts." 3. Invite a representative from a large insurance company to visit the class and discuss the relationship of accidents, insurance rates, and payments. 4. As a special project, have some students work with the local safety officer. If possible, have one or two students spend the day with him to observe his various duties. 5. Compare the cost of accidents in this country with other expenditures such as the amount spent for education, etc. 6. Have a few students visit a nearby industrial plant to interview the person responsible for the safety of the employees. They can report to the class on the employee safety program. 	<p><i>Books</i></p> <p>Life, John R., <i>et al. Concepts in Health, Course Three</i>.</p> <p>Life, John R., <i>et al. Concepts in Health, Course Four</i>.</p> <p><i>Pamphlet</i></p> <p>"Accident Facts." National Safety Council.</p> <p><i>Periodical</i></p> <p><i>Statistical Bulletin</i>. Metropolitan Life Insurance Company.</p>

Concepts and Primary Concerns	Sample Learning Experiences	Resources
b. Workmen's compensation laws (improved working conditions)	7. Have a safety supervisor of a nearby industrial organization visit the class and report on safety activities for the employees.	
<i>Environmental hazards can be controlled and accidents reduced.</i>		
1. Physical environment a. Need for adequate illumination b. Awareness of rapid change in weather conditions c. Awareness of dangers in absorption of carbon monoxide (1) Oxygen deficiency (2) Lowered attention span (3) Impaired vision (4) Lack of muscular coordination d. Awareness that increased humidity and temperature rise to 90°F impairs psychomotor coordination e. Need for marking glass doors to prevent injuries f. Need for protecting children from peeling house paint (lead poisoning) 2. Social environment (strained child-parent relationship creates hazardous emotional climate)	1. Have a small committee explore environmental hazards in a section of the community. Have the class discuss how these hazards can be corrected. 2. Have the students take pictures of various local environmental hazards or collect pictures of accidents caused by environmental conditions and make a bulletin board display or collage for school display. 3. Have the students conduct an informal inspection of various areas of the community and note the number of houses with peeling paint. 4. Have the students do research on the effects of lead poisoning on the body. 5. Have students do research on the various sources of possible lead poisoning in the environment.	<i>Books</i> Grout, Ruth E. <i>Health Teaching in Schools</i> . Oberteuffer, Delbert. <i>School Health Education</i> . Schneider, Robert E. <i>Methods and Materials of Health</i> . Strasser, Marland K. <i>Fundamentals of Safety Education</i> <i>Pamphlet</i> "Home Lighting." Massachusetts Safety Council.
<i>Many organizations are cooperating in safety promotion and accident prevention.</i>		
1. National organizations a. National Safety Council b. American Red Cross c. National Board of Fire Underwriters d. National Committee for Traffic Safety e. Medic-alert Foundation	1. Have the students identify various organizations and discuss their roles in making the nation a safer place in which to live. 2. Assign a student to contact the Medic-alert Foundation and report on its purpose and the services it offers. 3. Have the students compile a list of names and addresses of local organizations involved in	<i>Books</i> Byrd, Oliver E., et al. <i>Health Today and Tomorrow</i> . Stack, Herbert, and Elkow, J. <i>Duke Education for Safe Living</i> .

Concepts and Primary Concerns	Sample Learning Experiences	Resources
2. State and local organizations <ul style="list-style-type: none"> a. Massachusetts Safety Council b. Registry of Motor Vehicles c. Local police departments (safety officer) d. State police e. Boston Poison Information Center (Telephone 232-2120) f. Local chapter of the American Red Cross 	safety promotion. Discuss services offered by each of these organizations. 4. Have the students form volunteer groups to assist various safety promotion organizations in the community. 5. Invite the local safety officer to discuss the role of the police department in maintaining a safe environment.
